Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Plywood and Composite Products were proposed on January 9, 2003, and promulgated on July 30, 2004, and amended on February 16, 2006.

This regulation covers both new and existing plywood and composite wood products (PCWP) facilities. Plywood and/or composite products are manufactured by bonding wood material (fibers, particles, strands, veneers, *etc.*) or agricultural fiber with resin, generally under heat and pressure, to form a structural panel or engineered wood product. Plywood and composite products include, but are not limited to, plywood, veneer, particleboard, oriented strand board, hardboard, fiberboard, medium density fiberboard, laminated strand lumber, laminated veneer lumber, wood I-joists, kiln-dried lumber and glue-laminated beams.

Owners/operators of plywood and composite products facilities are required to submit initial notification, performance tests, and compliance status reports. Also, respondents are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are required. These notifications, reports, and records are essential in determining compliance and, in general, are required of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. Performance tests reports are required as this is the Agency's record of a source's initial capability to comply with the emission standard, and they serve as a record of the operating conditions under which compliance was achieved.

All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is
