Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From the Russian Federation; Final Results of the Expedited Sunset Review of Antidumping Duty Suspended Investigation

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of expedited sunset review of the antidumping duty suspended investigation on certain hot-rolled flat-rolled carbon-quality steel products from the Russian Federation; final results.

SUMMARY: On April 1, 2010, the Department of Commerce (“the Department”) initiated a sunset review of the antidumping duty suspended

antidumping duty investigation of certain hot-rolled flat-rolled carbon-quality steel products (“hot-rolled steel”) from the Russian Federation (“Russia”).¹ On the basis of the notice of intent to participate, an adequate substantive response submitted on behalf of the domestic interested parties, and no participation from respondent interested parties, the Department conducted an expedited sunset review of the suspended antidumping duty investigation pursuant to section 751(c)(3)(B) of the Act and section 351.218(e)(1)(ii)(C) of the Department’s regulations. As a result of this sunset review, the Department determined that termination of the antidumping duty suspended investigation would likely lead to continuation or recurrence of dumping at the levels listed below in the section entitled “Final Results of Review.”

DATES: *Effective Date:* August 5, 2010.

FOR FURTHER INFORMATION CONTACT: Anne D’Alauro or Sally C. Gannon, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington DC 20230; telephone: 202-482-4830 or 202-482-0162, respectively.

SUPPLEMENTARY INFORMATION:

Background

On April 1, 2010, the Department initiated a sunset review of the suspended antidumping duty investigation on hot-rolled steel from Russia in accordance with section 751(c) of the Tariff Act of 1930, as amended (“the Act”). *See Notice of Initiation*, 75 FR 16437 (2010). Section 351.218(d)(1)(i) of the Department’s regulations provides domestic interested parties opportunity to file a Notice of Intent to Participate in a Sunset Review within 15 days of initiation of review. The Department received notices of intent to participate within the applicable deadline specified in section 351.218(d)(1)(i) of the Department’s regulations on behalf of Nucor Corporation, United States Steel Corporation, Gallatin Steel, SSAB North America Division, ArcelorMittal USA, Inc., and Steel Dynamics, Inc. (collectively “domestic interested parties”). The domestic interested parties claimed interested-party status as producers of subject merchandise in the United States as defined by section 771(9)(C) of the Act. In addition, domestic interested parties assert that

they are not related to a foreign producer/exporter and are not importers, or related to importers, of the subject merchandise.

The Department’s regulations at section 351.218(d)(3)(i) state that all interested parties participating in a sunset review must submit a complete substantive response to a Notice of Initiation within 30 days of initiation of the sunset review. On May 3, 2010, the Department received a complete substantive response from the domestic interested parties within the 30-day deadline specified in the Department’s regulations under section 351.218(d)(3)(i). After examining the substantive response from the domestic interested parties, on May 21, 2010, the Department determined that the response was adequate, consistent with the requirements of 19 CFR 351.218(e). *See Memorandum from Anne D’Alauro, Senior Policy Analyst, Office of Policy, Import Administration, to Sally C. Gannon, Director for Bilateral Agreements, Office of Policy, Import Administration, regarding “Sunset Review of the Agreement Suspending the Antidumping Investigation of Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products from the Russian Federation: Adequacy Determination” (May 14, 2010).* *See also* Letter from Barbara E. Tillman, Director, Office 6, AD/CVD Operations, Import Administration, to Ms. Catherine DeFilippo, Director, Office of Investigations, International Trade Commission (May 21, 2010). Although the Department received a letter of appearance on behalf of the Russian Ministry of Economic Development, the Department did not receive any notices of intent to participate or substantive responses from respondent interested parties to this proceeding. As a result, pursuant to section 751(c)(3)(B) of the Act and section 351.218(e)(1)(ii)(C)(2) of the Department’s regulations, the Department conducted an expedited (120-day), sunset review of this antidumping duty suspended investigation.

Scope of the Suspended Investigation

See Appendix 1.

Analysis of Comments Received

All issues raised in this sunset review are addressed in the “Issues and Decision Memorandum” (“Decision Memo”) from Paul Piquado, Deputy Assistant Secretary for Policy and Negotiations, Import Administration, to Ronald Lorentzen, Deputy Assistant Secretary for Import Administration, dated July 30, 2010, which is hereby adopted by this notice. The issues

¹ *See Initiation of Five-Year (“Sunset”) Review*, 75 FR 16437 (April 1, 2010) (*Notice of Initiation*).

discussed in the Decision Memo include both the likely effects of termination of the suspension agreement and underlying investigation and the magnitude of the margin likely to prevail if the suspended investigation were terminated. Parties can find a complete discussion of all issues raised in this sunset review and the corresponding recommendations in this public memo, which is on file in room 1117 of the main Commerce Building.

In addition, a complete version of the Decision Memo can be accessed directly on the Web at <http://ia.ita.doc.gov/frn>, under the heading "August 2010". The paper copy and electronic version of the Decision Memo are identical in content.

Final Results of Review

The Department determines that termination of the suspended antidumping duty investigation on hot-rolled steel from Russia would be likely to lead to continuation or recurrence of dumping at the following weighted-average margins:

Manufacturers/producers/exporters	Weighted-average margin (percent)
JSC Severstal	73.59
Russia-Wide Rate	184.56

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction

of APO materials or conversion to judicial protective order is requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing the results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act.

Dated: July 30, 2010.

Ronald K. Lorentzen,
Deputy Assistant Secretary for Import Administration.

Appendix I

For the purposes of this Suspension Agreement, "hot-rolled steel" means certain hot-rolled flat-rolled carbon-quality steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness.

Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this agreement.

Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free ("IF")) steels, high strength low alloy ("HSLA") steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as

chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this agreement, regardless of HTSUS definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated: 1.80 percent of manganese, or 1.50 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.012 percent of boron, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.41 percent of titanium, or 0.15 percent of vanadium, or 0.15 percent of zirconium.
