Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Kentucky; Redesignation of the Kentucky Portion of the Cincinnati-Hamilton 1997 8-Hour Ozone Nonattainment Area to Attainment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve a request submitted on January 29, 2010, from the Commonwealth of Kentucky, through the Kentucky Energy and Environment Cabinet, Division for Air Quality (DAQ), to redesignate the Kentucky portion of the tri-state Cincinnati-Hamilton 8-hour ozone nonattainment area (hereafter referred to as “the Cincinnati-Hamilton Area”) to attainment for the 1997 8-hour ozone national ambient air quality standards (NAAQS). The Cincinnati-Hamilton Area is comprised of Boone, Campbell and Kenton Counties in Kentucky (hereafter also referred to as “Northern Kentucky”); Butler, Clermont, Clinton, Hamilton and Warren Counties in Ohio; and a portion of Dearborn County in Indiana. EPA’s approval of the redesignation request is based on the determination that Northern Kentucky has met the criteria for redesignation to attainment set forth in the Clean Air Act (CAA), including the determination that the Cincinnati-Hamilton Area has attained the 1997 8-hour ozone NAAQS. Additionally, EPA is approving a revision to the Kentucky State Implementation Plan (SIP) including the 1997 8-hour ozone maintenance plan for Northern Kentucky that contains the new 2015 and 2020 motor vehicle emission budgets (MVEBs) for nitrogen oxides (NO_x) and volatile organic compounds (VOC) for Northern Kentucky. This action also approves the emissions inventory submitted with the maintenance plan. EPA has previously approved, in a separate rulemaking, similar redesignation requests submitted by the States of Ohio and Indiana for

their portions of this 1997 8-hour ozone area.

DATES: *Effective Date:* This rule will be effective August 5, 2010.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA-R04-OAR-2010-0134. All documents in the docket are listed on the <http://www.regulations.gov> Web site. I. What Is the Background for the Actions?

On January 29, 2010, the Commonwealth of Kentucky, through DAQ, submitted a request to redesignate Northern Kentucky (as a portion of the Cincinnati-Hamilton Area) to attainment for the 1997 8-hour ozone NAAQS, and for EPA approval of the Kentucky SIP revision containing a maintenance plan for Northern Kentucky. In an action published on May 12, 2010 (75 FR

26685), EPA proposed to approve the redesignation of Northern Kentucky to attainment. EPA also proposed approval as a SIP revision of Kentucky’s plan for maintaining the 1997 8-hour NAAQS, including the emissions inventory submitted pursuant to CAA section 172(c)(3); and the NO_x and VOC MVEBs for Northern Kentucky contained in the maintenance plan. The background for these rulemakings is set forth in detail in EPA’s May 12, 2010 proposal.

The MVEBs included in the maintenance plan are as follows:

TABLE 1—NORTHERN KENTUCKY VOC AND NO_x MVEBS

[Summer season tons per day (tpd)]

Year	2015	2020
NO _x	14.40	13.27
VOC	9.76	10.07

In its May 12, 2010, proposed action, EPA stated that the adequacy public comment period on these MVEBs (as contained in Kentucky’s submittal) began on February 3, 2010, and closed on March 5, 2010. No comments were received during this public comment period, and therefore, EPA deems the new MVEBs for Northern Kentucky adequate for the purposes of transportation conformity. In a separate action, EPA previously found adequate and approved the MVEB’s for the Ohio and Indiana portions of the Cincinnati-Hamilton Area (75 FR 26118, May 11, 2010).

As we stated in the May 12, 2010, proposal, this redesignation addresses Northern Kentucky’s status solely with respect to the 1997 8-hour ozone NAAQS, for which designations were finalized on April 30, 2004 (69 FR 23857). In 2008, EPA issued a revised 8-hour ozone NAAQS, which is currently under reconsideration. Today’s rulemaking concerns only the 1997 8-hour ozone NAAQS, and does not address or affect the 2008 or any subsequently revised and promulgated ozone NAAQS.

In this final rulemaking, EPA is noting a correction for the site identification numbers listed in EPA’s May 12, 2010 (75 FR 26685), proposed approval. Specifically, the air quality monitor site identification number (ID) listed in Table 2 (Annual 4th Max High and Design Value Concentration for 8-Hour Ozone for the Cincinnati-Hamilton OH-KY-IN Area (parts per million)) of EPA’s May 12, 2010 proposed rulemaking, column 3 labeled “Monitor” were incorrect for the Boone and Campbell County, Kentucky entries. The site monitor IDs should read: Boone
