

assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Review Workshop Report documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; international experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR conducts updates of benchmark stock assessments previously conducted through the SEDAR program. Update assessments add additional data points to datasets incorporated in the original SEDAR benchmark assessment and run the benchmark assessment model to update population estimates.

The greater amberjack update assessment will update the SEDAR 9 benchmark of Gulf of Mexico greater amberjack. The update process consists of a series of webinars.

**Greater Amberjack Update Schedule:
August 25, 2010; 1 p.m.—4 p.m.;
SEDAR Update Assessment Webinar I**

Using updated datasets adopted during the Data Webinar, participants will employ assessment models used in SEDAR 9 to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.
