

Both telltale lamps will then remain illuminated during the rest of the ignition cycle independent of vehicle speed. When the ignition is subsequently cycled, both the ESC and TPMS telltale lamps will re-illuminate. Depending on the subsequent scenario of the drive cycle, the two telltale lamps can behave in different ways. The nonconforming scenario occurs when the vehicle is maintained at a speed range between 6.2–12.5 miles per hour (mph) for a period of time where the ESC malfunction logic code could be cleared from the control system and cause the ESC and TPMS telltale lamps to extinguish. If the 6.2–12.5 mph speed range is maintained for a longer period of time after the ESC and TPMS telltale lamps extinguish (about 5 minutes), the TPMS will recognize the incompatible tire and set the TPMS malfunction logic code and re-illuminate the TPMS telltale lamp. The TPMS telltale lamp will stay illuminated for as long as the incompatible tire is mounted, independent of any ESC malfunctions.

Volkswagen argues that this noncompliance is inconsequential to motor vehicle safety for the following reasons:

1. The TPMS telltale lamp will immediately re-illuminate if the vehicle is accelerated above 12.5 mph, and remain on throughout the ignition cycle regardless of the vehicle's speed.

2. The TPMS telltale lamp would re-illuminate within several minutes (about 5 minutes) if the speed under 12.5 mph and over 6.2 mph was maintained.

3. The function of the TPMS telltale lamp given this condition would never lead to a "flicker" of the light or other such confusing performance of the signal except as required in FMVSS No. 138 S4.4(c).

4. Operation of the vehicle with an incompatible tire for a short distance under 12.5 mph presents no safety risk. Given that the TPMS telltale lamp would re-illuminate promptly upon the TPMS recognizing the incompatible tire at a lower speed or upon acceleration, the chance is insignificant that a driver might be confused by the signal, or even notice it.

5. Volkswagen is not aware of any field or customer complaints regarding this noncompliance.

Volkswagen also informed NHTSA that it has corrected the problem that caused this noncompliance so that it will not be repeated in future production.

In summation, Volkswagen believes that the described noncompliance of its vehicles to meet the requirements of FMVSS No. 138 is inconsequential as it

relates to motor vehicle safety, and that its petition, to exempt from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.
