Title: NSPS for Stationary Gas Turbines (Renewal).

ICR Numbers: EPA ICR Number 1071.10, OMB Control Number 2060-0028.

ICR Status: This ICR is schedule to expire on October 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standard (NSPS) for Stationary Gas Turbines (40 CFR part

60, subpart GG) were proposed on October 3, 1977, and promulgated on September 10, 1979.

Owners and operators of stationary gas turbines must submit a one-time-only notification of construction/reconstruction, modification, and startup date, initial performance test date, physical or operational changes, and demonstration of a continuous monitoring system. They also must provide a report on initial performance test result, monitoring results, and any excess emissions. Records must be maintained of: Startups, shutdowns, and malfunctions; periods when the continuous monitoring system is inoperative; sulfur and nitrogen content of the fuel; fuel to water ratio; rate of fuel consumption; and ambient conditions. Semiannual reports are also required.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, retain the file for at least two years following the date of such measurements, and maintain reports and records. Performance test reports are required as this is the Agency's record of a source's initial capability to comply with the emission standard, and they serve as a record of the operating conditions under which compliance was achieved.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart GG, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are list in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information are estimated to average 64 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and

maintaining, information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Stationary gas turbines.

Estimated Number of Respondents: 535.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 68,447.

Estimated Total Annual Cost:

\$6,474,328, which includes \$6,474,328 in labor costs exclusively, with neither capital/startup costs nor any operation and maintenance (O&M) costs.

Changes in the Estimates: There is no increase in the number of affected facilities or the number of responses compared to the previous ICR.

There is however, an increase in the estimated labor burden hours and cost as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the labor burden hours and cost estimates has occurred because the previous ICR did not reflect the managerial and clerical burden. This renewal package includes those costs. We also updated the labor rates, which resulted in an increase in labor costs.

Dated: August 5, 2010.

John Moses,

Director, Collection Strategies Division.
