Approval and Promulgation of Air Quality Implementation Plans; MN**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: EPA is proposing to approve Minnesota's request to amend its State Implementation Plan (SIP) for sulfur dioxide (SO₂). The Minnesota Pollution Control Agency submitted the SIP revision request to EPA on November 23, 2009, and supplemented it on March 3, 2010. The approval of this request would revise SIP requirements applicable to Saint Mary's Hospital, located in Rochester, Minnesota by adding a 2500 kilowatt (KW) reciprocating internal combustion engine (RICE) electric generator and reducing the allowable diesel fuel sulfur content for two existing RICE electric generators. The revision also includes administrative changes in the identification of emissions units. These revisions are included in a joint Title I/ Title V document for Saint Mary's Hospital, which would replace the document currently approved into the SIP for the facility. These revisions will result in reducing the SO₂ impact in the Rochester area, and strengthening the existing SO₂ SIP.

Endangered and Threatened Wildlife and Plants; Removing the Tennessee Purple Coneflower From the Federal List of Endangered and Threatened Plants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; availability of draft post-delisting monitoring plan.

SUMMARY: Under the authority of the Endangered Species Act of 1973, as amended (Act), we, the U.S. Fish and Wildlife Service (Service), propose to remove the plant *Echinacea tennesseensis* (Tennessee purple coneflower) from the Federal List of Endangered and Threatened Plants due to recovery. This action is based on a thorough review of the best available scientific and commercial data, which indicate that this species' status has improved to the point that *E. tennesseensis* is not likely to become endangered within the foreseeable future throughout all or a significant portion of its range. Our review of the status of this species shows that all of the threats to the species have been

eliminated or significantly reduced, adequate regulatory mechanisms exist, and populations are stable. We also announce the availability of the draft post-delisting monitoring plan. This proposed rule completes the 5-year status review for the species, initiated on September 21, 2007.
