SUPPLEMENTARY INFORMATION:

Introduction

Protection Island NWR is located in the Strait of Juan de Fuca near the entrance to Discovery Bay in Jefferson County, Washington. It includes 659 acres of land and tideland. Protection Island NWR was established to provide habitat for a diversity of birds with particular emphasis on nesting bald eagles and seabirds, as well as to protect the hauling-out area for marine mammals. It has one of the largest colonies of rhinoceros auklets in North America. The Refuge also provides opportunities for scientific research and wildlife-oriented education and interpretation.

Most of the San Juan Islands NWR consists of rocks, reefs, and islands scattered throughout the San Juan Archipelago. Two islands, Smith and Minor, are located south of the archipelago within the Strait of Juan de Fuca. The Refuge consists of approximately 449 acres in Island, San Juan, Skagit, and Whatcom Counties, Washington. Most (353 acres) of San Juan Islands NWR is also designated wilderness known as the San Juan Islands Wilderness Area. San Juan Islands NWR was established to facilitate management of migratory birds, including serving as a breeding ground and winter sanctuary for native birds. It was also intended to be a refuge for other wildlife. This Refuge is particularly important to breeding black oystercatchers, cormorants, and harbor seals.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years
