

assessment of double antidumping duties.

Notification to Interested Parties

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing these results of review in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: August 11, 2010.

Ronald K. Lorentzen,

Deputy Assistant Secretary for Import Administration.

Appendix—Issues in Decision Memorandum

1. Offsetting of Negative Margins
2. Capping of Certain Revenues Received by Cutrale by the Amount of Reported Expenses
3. Clerical Error in Cutrale's Dumping Margin
4. Use of Actual Brix to Calculate the Prices and Quantities for Cutrale's U.S. Sales
5. Use of Actual Brix for Comparison Purposes for Cutrale's Home Market Sales
6. Request for Revocation by Cutrale
7. Constructed Export Price Offset for Cutrale
8. Cutrale's Cost of Oranges from Affiliated Parties
9. Cutrale's By-Product Revenue Offset to Cost of Goods Sold (COGS)
10. Cutrale's Other Adjustments to COGS to Reflect Adjustments to the Cost of Manufacture
11. Fischer's International Freight Expenses
12. Net Exchange Variation for Fischer
13. Fischer's Intercompany Interest Expenses
14. Offset to Intercompany Interest Expenses for Fischer's Financial Expenses
15. Market Prices for the Sale of Certain By-Products for Fischer
16. Fischer's Unrealized and Eradication Expenses

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XY05

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper and Grouper Off the Southern Atlantic States

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from the Gulf and South Atlantic Fisheries Foundation, Inc. If granted, the EFP will authorize the applicants, with certain conditions, to collect limited numbers of fish and invertebrates where possession and retention is restricted or prohibited by regulations in South Atlantic Federal waters. This study is intended to characterize catch and discard mortality within the South Atlantic commercial hook-and-line snapper-grouper fishery.

DATES: Comments must be received no later than 5 p.m., eastern time, on September 17, 2010.

ADDRESSES: You may submit comments on the application by any of the following methods:

- E-mail: Steve.Branstetter@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: "FND_EFP".
- Mail: Steve Branstetter, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.
- Fax: 727-824-5308.

The application and related documents are available for review upon written request to any of the above addresses.

FOR FURTHER INFORMATION CONTACT:

Steve Branstetter, 727-824-5305; fax: 727-824-5308; e-mail: Steve.Branstetter@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

The described research is part of the Cooperative Research Program. The Cooperative Research Program is a means of involving commercial and recreational fishermen in the collection of fundamental fisheries information.

Resource collection efforts support the development and evaluation of fisheries management and regulatory options.

The proposed collection for scientific research involves activities otherwise prohibited by regulations at 50 CFR 622 implementing the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region. The applicant requires authorization to collect limited numbers of snapper and grouper and other marine resources, where possession and retention is otherwise restricted or prohibited by regulations, for scientific research activities for a 24-month period beginning September 2010. Specimens would be collected from Federal waters off the east coast of Florida and Federal waters off the coasts of Georgia, South Carolina, and North Carolina. Sampling would occur during normal fishing operations of the commercial snapper-grouper vertical hook-and-line fishery. Sampling would occur year-round, collecting as many as 500 fish during the course of the sampling. Data collections for this study would support improved information about the catch, bycatch, discards, and discard mortality for species in the snapper-grouper complex. These data would provide insight on a stock's resilience to fishing, and would help refine estimates of long-term biological productivity of the stocks. Currently, these data are unavailable, and it is anticipated that project results would yield valuable data within this fishery.

NMFS finds this application warrants further consideration. Based on a preliminary review, NMFS intends to issue an EFP. The limited sampling program and associated sampling methodology listed in the EFP is not expected to impact the fishery stocks; the estimated 500 fish to be retained in the 2-year period represents a small fraction of the average annual landings. Similarly, the sampling program is not expected to have an impact on marine mammals or threatened or endangered species or their critical habitat in any manner that has not been considered in the 2006 biological opinion, the 2007 consultation regarding *Acropora*, and the 2008 listing of *Acropora* critical habitat, in regard to the existing fishery management plan. The biological opinion specifically addresses the impacts associated with EFPs. It considers fishing activities authorized under an EFP within the scope of the opinion, if those activities do not significantly increase the overall fishing effort within the fishery, and fishing is conducted by commercial or research vessels, using similar or identical

fishing methods to those employed in the fishery.

Possible conditions the agency may impose on this permit, if it is indeed granted, include but are not limited to, a prohibition of conducting research within marine protected areas, marine sanctuaries, or special management zones, without additional authorization. Additionally, NMFS may prohibit the possession of Nassau or goliath grouper, and require any sea turtles taken incidentally during the course of fishing or scientific research activities to be handled with due care to prevent injury to live specimens, observed for activity, and returned to the water. The applicant's field personnel are considered designated agents of NMFS while conducting work under a NMFS-funded research grant. They are authorized to handle sea turtles encountered during the course of this study. A final decision on issuance of the EFP will depend upon a NMFS review of public comments received on the application, consultations with the affected states, the South Atlantic Fishery Management Council, and the U.S. Coast Guard, and a determination that it is consistent with all applicable laws.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 13, 2010.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the South Atlantic and Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Assessment Webinar 6 for SEDAR 22 Yellowedge Grouper and Tilefish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 22 Gulf of Mexico yellowedge grouper and tilefish assessment webinar 6.

SUMMARY: The SEDAR 22 assessments of the Gulf of Mexico stocks of yellowedge grouper and tilefish will consist of a series of workshops and webinars: a Data Workshop, a series of Assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION.**

DATES: The fifth SEDAR 22 Assessment Process webinar will be held on Wednesday, September 1, 2010, from 12 noon to approximately 4 p.m. (EDT). The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie Neer at SEDAR to request an invitation providing webinar access information.

A listening station will be available at the Gulf of Mexico Fishery Management Council office located at 2203 N Lois Avenue, Suite 1100, Tampa, Florida 33607. Those interested in participating via the listening station should contact Julie A. Neer at SEDAR at least 1 day prior to the webinar.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator, 4055 Faber Place, Suite 201, North Charleston, SC 29405; phone (843) 571-4366. Email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop, (2) Assessment Process utilizing webinars and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center.

Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 22 Assessment Webinar VI

Using datasets recommended from the Data Workshop, participants will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Meeting Schedule

September 1, 2010, from 12 noon to 4 p.m. (EDT)

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Dated: August 13, 2010.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Pure Magnesium In Granular Form from the People's Republic of China: Initiation of Changed Circumstances Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce ("Department") has received information sufficient to warrant initiation of a changed circumstances review of the antidumping duty order on pure magnesium in granular form from the People's Republic of China ("PRC"). Specifically, based upon a request filed by China Minmetals Non-ferrous Metals Co., Ltd. ("CMN"), the Department is initiating a changed circumstances review to determine whether CMN is the successor-in-interest to Minmetals Precious & Rare Minerals Import and Export/China National Nonferrous
