

when in actual use throughout their useful life.

The program can be broken down into three closely-related headings. The first is a surveillance program that selects approximately 50 classes of passenger cars and light trucks for in-use testing, at EPA's testing facility, totaling approximately 150 vehicles (three in each class on average). In rare cases surveillance testing may be followed by compliance testing (only three such classes in the last five years). The purpose of a compliance phase is to develop additional information related to test failures observed in a class during surveillance testing. The second heading is testing of a subset of approximately 35 vehicles from the surveillance recruitment for operation of on-board diagnostics (OBD) systems. The third category is special investigations involving testing of vehicles to address specific issues. The number of vehicles procured under this category varies widely from year to year, but this request asks for approval of the information burden corresponding to 25 such vehicles per year for the next three years.

Participation in the light-duty surveys, as well as the vehicle testing, is strictly voluntary. A group of 25 to 50 potential participants is identified from State vehicle registration records. They are asked to return a postcard indicating their willingness to participate and if so, to verify some limited vehicle information. Three of those who return the card are called and asked about a half dozen questions concerning vehicle condition, and operation and maintenance. Additional groups of potential participants may be contacted until a sufficient number of vehicles has been obtained. Owners verify the survey information when they deliver their vehicles to EPA, voluntarily provide maintenance records for copying, and receive a loaner car and/or a cash incentive.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7.3 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR Supporting Statement provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: Approximately 4,285 owners/lessees receive EPA's solicitations to participate and approximately 164 do participate.

Frequency of response: On Occasion.

Estimated total average number of responses for each respondent: One.

Estimated total annual burden hours: 521.

Estimated total annual costs: \$11,295. This includes an estimated burden cost of \$11,295 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 90 responses and 98 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease is entirely due to removal of the heavy-duty and non-road portions of this ICR, which will henceforth be covered under a different information collection request. This ICR was previously titled, "EPA's In-Use Vehicle and Engine Testing Programs."

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
