The fruits and vegetables are treated
in accordance with 7 CFR part 305 and
the treatment is certified by an
inspector;

● The fruits and vegetables are
inspected and certified in the State of
origin by an inspector and have been
found free of one or more specific
quarantine pests identified by risk
analysis as likely to follow the pathway;

● The fruits and vegetables are moved
as commercial consignments only; and/or

● The fruits and vegetables may be
distributed only within a defined area
and the boxes or containers in which
the fruits or vegetables are distributed
must be marked to indicate the
applicable distribution restrictions.

APHIS received a request from the
Hawaii Department of Agriculture to
allow the interstate movement of fresh
guava fruit from Hawaii to the
continental United States. We have
completed a pest list to identify pests of
quarantine significance that could
follow the pathway of interstate
movement into the continental United
States and, based on that pest list, have
prepared a risk management analysis to
identify phytosanitary measures that
could be applied to the commodity to
mitigate the pest risk. We have
concluded that guavas can be safely
moved from Hawaii to the continental
United States using one or more of the
six designated phytosanitary measures
listed in § 318.13-4(b). Therefore, in
accordance with § 318.13-4(c), we are
announcing the availability of our pest
risk analysis for public review and
comment. The pest risk analysis may be
viewed on the Regulations.gov Web site
or in our reading room (see ADDRESSES
above for instructions for accessing
Regulations.gov and information on the
location and hours of the reading room).
You may request paper copies of the
pest risk analysis by calling or writing
to the person listed under FOR FURTHER
INFORMATION CONTACT. Please refer to the
subject of the pest risk analysis when
requesting copies.

After reviewing the comments we
receive, we will announce our decision
regarding the interstate movement of
guavas from Hawaii to the continental
United States in a subsequent notice. If
the overall conclusions of the analysis
and the Administrator’s determination
of risk remain unchanged following our
consideration of the comments, then we
will begin allowing the interstate
movement of guavas from Hawaii to the
continental United States subject to the
requirements specified in the risk
management document.

Authority: 7 U.S.C. 7701-7772 and 7781-
7786; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 18th day
of August 2010.

Kevin Shea
Acting Administrator, Animal and Plant
Health Inspection Service.

BILLING CODE 3410–34–S

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection
Service

[Docket No. APHIS-2010-0059]

Notice of Availability of a Treatment
Evaluation Document

AGENCY: Animal and Plant Health
Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public
that we have determined that it is
necessary to revise a treatment schedule
in the Plant Protection and Quarantine
Treatment Manual and to retain the
current treatment schedule with a
different treatment number. We have
prepared a treatment evaluation
document that discusses the existing
treatment schedule, describes the new
treatment schedule, and explains why
these change are necessary. We are
making the treatment evaluation
document available to the public for
review and comment.

DATES: We will consider all comments
that we receive on or before October 25,
2010.

ADDRESSES: You may submit comments
by either of the following methods:

● Federal eRulemaking Portal: Go to
(http://www.regulations.gov/
fdmspublic/component/
main?main=DocketDetail&d=APHIS-
2010-0059) to submit or view comments
and to view supporting and related
materials available electronically.

● Postal Mail/Commercial Delivery:
Please send one copy of your comment
to Docket No. APHIS-2010-0059,
Regulatory Analysis and Development,
PPD, APHIS, Station 3A–03.8, 4700
River Road Unit 118, Riverdale, MD
20737-1238. Please state that your
comment refers to Docket No. APHIS-
2010-0059.

Reading Room: You may read any
comments that we receive on this
docket in our reading room. The reading
room is located in room 1141 of the
USDA South Building, 14th Street and
Independence Avenue SW.,
Washington, DC. Normal reading room
hours are 8 a.m. to 4:30 p.m., Monday
through Friday, except holidays. To be
sure someone is there to help you,
The regulations in 7 CFR chapter III are intended, among other things, to prevent the introduction or dissemination of plant pests and noxious weeds into or within the United States. Under the regulations, certain plants, fruits, vegetables, and other articles must be treated before they may be moved into the United States or interstate. The phytosanitary treatments regulations contained in part 305 of 7 CFR chapter III (referred to below as the regulations) set out standards for treatments required in parts 301, 318, and 319 of 7 CFR chapter III for fruits, vegetables, and other articles.

In § 305.2, paragraph (b) states that approved treatment schedules are set out in the Plant Protection and Quarantine (PPQ) Treatment Manual. Section 305.3 sets out a process for adding, revising, or removing treatment schedules in the PPQ Treatment Manual. In that section, paragraph (a) sets out the process for adding, revising, or removing treatment schedules when there is an immediate need to make a change. The circumstances in which an immediate need exists are described in § 305.3(b)(1).

In accordance with § 305.3(a)(1), we are providing notice that we have determined that it is necessary to revise treatment schedule T314-a, which provides a heat treatment schedule for ash logs, including firewood, and all hardwood firewood that are moved from emerald ash borer quarantined areas. We have also determined that it is necessary to retain the current T314-a as a general treatment for various wood pests (rather than just emerald ash borer); we would redesignate this treatment schedule as T314-c in the Treatment Manual. The reasons for these changes are described in a treatment evaluation document we have prepared to support this action. The treatment evaluation document may be viewed on the Regulations.gov Web site or in our reading room (see ADDRESSES below for instructions for accessing Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the treatment evaluation document by calling or writing to the person listed under FOR FURTHER INFORMATION CONTACT. Please refer to the subject of the treatment evaluation document when requesting copies.

After reviewing the comments we receive, we will announce our decision regarding the changes to the Treatment Manual that are described in the treatment evaluation document in a subsequent notice. If our determination that it is necessary to revise T314-a and add a new T314-c remains unchanged following our consideration of the comments, then we will make available a new version of the PPQ Treatment Manual that reflects the revision of T314-a and the addition of T314-c.

Done in Washington, DC, this 18th day of August 2010.

Kevin Shea
Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-S

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title: Alaska Region Amendment 80 Permits and Reports.

OMB Control Number: 0648-0565.

Form Number(s): NA.

Type of Request: Regular submission (extension of a currently approved information collection).

Number of Respondents: 38.

Average Hours per Response:
Applications for cooperative quota share, for cooperative and cooperative quota permit, and for limited access fishery permit, 2 hours; applications to transfer quota share and cooperative quota, 2 hours; annual cooperative report, 25 hours; appeals, 4 hours.

Burden Hours: 155.

Needs and Uses: This request is for extension of a currently approved information collection. Amendment 80 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP), primarily allocates BSAI non-pollock trawl groundfish fisheries among fishing sectors and facilitates the formation of harvesting cooperatives in the head-and-gut trawl catcher/processor sector. Amendment 80 established a limited access privilege program for the non-American Fisheries Act trawl catcher/processor sector. The Amendment 80 permits and reports collection provides participants with a management system that allows for improved efficiency by providing an environment in which, revenues can be increased and operating costs can be reduced. Depending on the magnitude of these potential efficiency gains and the costs of bycatch reduction, increases in efficiency could be used to cover the costs of bycatch reduction measures or provide additional benefits to participants.

Licenses and vessels used to qualify for the Amendment 80 Program (either to be included in the non-American Fisheries Act trawl catcher/processor sector or to be used in Amendment 80 cooperative formation) are restricted from being used outside of the Amendment 80 sector, except that any eligible vessel authorized to fish pollock under the AFA would still be authorized to fish under this statute.

Fishery participants that join a cooperative receive an exclusive harvest privilege not subject to harvest by other vessel operators; may consolidate fishing operations on a specific vessel or subset of vessels, thereby reducing monitoring and enforcement and other operational costs; and harvest fish in a more economically efficient and less wasteful manner.

Affected Public: Business or other for-profit organizations.

Frequency: Annually and on occasion.

Respondent’s Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 355-3358.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek,
