III. Data
Title: NASA Contractor Financial Management Reports.
OMB Number: 2700–XXXX.
Type of Review: New Collection.
Affected Public: Business Individuals or Households.
Estimated Number of Respondents: 15,571 (15,251 survey; 320 survey/interview).
Estimated Number of Responses per Respondent: 1 or 2 (survey only; survey and interview).
Estimated Time per Response: 20 minutes for survey; 50 minutes for survey and interview.
Estimated Total Annual Burden Hours: 5298.43 hours.
Estimated Total Annual Cost: $0.00.

IV. Request for Comments
Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA’s estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Lori Parker,
NASA Clearance Officer.

NUCLEAR REGULATORY COMMISSION
[NRC–2009–0364]
Notice of Availability of Final Supplemental Environmental Impact Statement for the Moore Ranch In-situ Recovery Project in Campbell County, Wyoming, Supplement to the Generic Environmental Impact Statement for In-situ Leach Uranium Milling Facilities
AGENCY: Nuclear Regulatory Commission.
ACTION: Notice of availability.
SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has published a final Supplemental Environmental Impact Statement (SEIS) to the Generic Environmental Impact Statement for In-situ Leach Uranium Milling Facilities (GEIS), (NUREG–1910, Supplement 1) regarding the Moore Ranch In-Situ Recovery Project in Campbell County, Wyoming. By letter dated October 2, 2007, Energy Metals Corporation, a wholly-owned subsidiary of Uranium One Americas (Uranium One), submitted an application to the NRC for a new source material license for the proposed Moore Ranch Project, located in southwest Campbell County, Wyoming. Uranium One is proposing to recover uranium from the Moore Ranch site using the in-situ leach (also known as the in-situ recovery [ISR]) process. In this final SEIS, the NRC staff assessed the environmental impacts from the construction, operation, aquifer restoration, and decommissioning of the proposed Moore Ranch ISR Project.
In addition to the proposed action, the NRC staff assessed the no-action alternative in the final SEIS. Under this alternative, NRC would deny Uranium One’s request to construct, operate, conduct aquifer restoration, and decommission an ISR facility at the Moore Ranch Project. Possible alternatives that were considered, but were eliminated from detailed analysis include: conventional mining (whether by open pit or underground techniques) and conventional milling or heap leach processing. However, given the substantial environmental impacts of these alternatives, they were not further considered. The NRC staff also evaluated alternative lixiviant, alternative wastewater disposal options, and an alternative site location within the proposed license area. For reasons discussed in the SEIS, these alternatives were also eliminated from further consideration.
As discussed in Section 2.3 of the final SEIS, unless safety issues mandate otherwise, the NRC staff’s recommendation to the Commission related to the environmental aspects of the proposed action is that the source material license be issued as requested. This recommendation is based upon (1) the license application, including the environmental report submitted by Uranium One and the applicant’s supplemental letters and responses to the NRC staff’s requests for additional information; (2) consultation with Federal, State, Tribal, and local agencies; (3) the NRC staff’s independent review; (4) the NRC staff’s consideration of comments received on the draft SEIS; and (5) the assessments summarized in this SEIS.
The final SEIS for the Moore Ranch ISR Project may be accessed on the internet at http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1910/s1/. Additionally, the NRC maintains an Agencywide Documents and Management System (ADAMS), which provides text and image files of the NRC’s public documents. The SEIS may also be accessed through the NRC’s Public Electronic Reading Room on the internet at: http://www.nrc.gov/reading-rm/adams.html. The “Environmental Impact Statement for the Moore Ranch ISR Project in Campbell County, Wyoming—Supplement to the Generic Environmental Impact Statement for In-situ Leach Uranium Milling Facilities” is available electronically under ADAMS Accession Number ML102290470. If you do not have access to ADAMS or if there is a problem accessing documents located in ADAMS, contact the NRC Public Document Room (PDR) reference staff at 1 (800) 397–4209, 1 (301) 415–4737, or by e-mail to pdr.resource@nrc.gov. Hard copies of the final SEIS are available upon request. Both information and...
