DEPARTMENT OF DEFENSE

Department of the Army

Record of Decision (ROD) for Fort Bliss Army Growth and Force Structure Realignment

AGENCY: Department of the Army, DoD.

ACTION: Notice of availability.

SUMMARY: The Department of the Army announces the availability of a ROD that documents and summarizes the implementation of the preferred alternative described in the Fort Bliss Army Growth and Force Structure Realignment Final Environmental Impact Statement (hereinafter referred to as the FEIS). The preferred alternative consists of actions in three different categories (stationing/training, land use changes, and training infrastructure improvements) of interrelated alternatives.

The following actions will be implemented as elements of the preferred alternative: The stationing of two Infantry Brigade Combat Teams (IBCTs), up to two Stryker Brigade Combat Teams (SBCTs), and various support units to Fort Bliss (Stationing Action Alternative 4); land use changes that allow fixed site bivouac areas, mission support facilities, live-fire ranges and off-road vehicle grounds in new locations in the vicinity of the Sacramento Mountains and areas of McGregor Range (Land Use Alternative 5); and training infrastructure improvements, including construction of new ranges to support the stationing of IBCTs and SBCTs, expansion of existing range camps, construction of 16 Contingency Operating Locations (COLs), and construction of a rail line connecting the Fort Bliss Cantonment to the Fort Bliss Training Complex (Training Infrastructure Alternative 4).

ADDRESSES: Copies of the ROD are available from Mr. John F. Barrera, IMWE–BLS–PWE, Building 624, Taylor Road, Fort Bliss, TX 79916–6812; e-mail: bliss.eis@conus.army.mil.

FOR FURTHER INFORMATION CONTACT: Ms. Jean Offutt, Public Affairs Officer, IMWE–BLS–PA; Fort Bliss, TX 79916–6812; telephone: (915) 568–4505; fax: (915) 568–2995; e-mail: jeann.offutt@us.army.mil.

SUPPLEMENTARY INFORMATION: The ROD supports Army expansion, future stationing actions, and land use changes and training infrastructure improvements. These changes take advantage of Fort Bliss’s varied terrain and full suite of training ranges which will allow collocation of heavy, light, and aviation combat units and support units.

Land use analysis focused primarily on the McGregor Range’s northeast terrain, with minor changes in the southeast and Tularosa Basin portions to support light infantry training. None of the land use changes involve the Culp Canyon Wilderness Study Area or the
Black Grama Grassland Area of Critical Environmental Concern.

Construction of additional firing ranges and the expansion or construction of administrative and training support facilities were also analyzed.

The effects of implementing the ROD alternatives included substantial erosion to interior range roads, requiring increased maintenance. Frequent overseas deployments will require an increase in training, which may reduce public and Native American access to some areas of the installation. Use of restricted airspace for military training will increase, making military scheduling of the airspace more complex. Training-related noise remains significant in areas adjacent to Dona Ana Range and portions of McGregor Range. The Army has identified measures in the FEIS to mitigate most of the significant environmental effects.

The preferred alternatives may result in a small increase in the economic benefit provided by growth of the installation, and a small decrease in certain quality of life indicators (e.g., traffic, air quality).

The ROD, FEIS and other environmental documents are available on the Fort Bliss Web site (http://www.bliss.army.mil/) or at the following locations: El Paso, TX: Richard Burges Regional Library, 9600 Dyer; Irving Schwartz Branch Library, 1865 Dean Martin; the Clardy Fox Branch Library, 5515 Robert Alva; Doris van Doren Regional Branch Library, 551 Redd Road; Las Cruces, NM: New Mexico State University Zuhl Library, 2999 McFie Circle; Alamogordo, NM: Alamogordo Public Library, 920 Oregon Avenue.

Dated: August 12, 2010.

Addison D. Davis, IV,
Deputy Assistant Secretary of the Army (Environment, Safety, and Occupational Health).

Title: Cooling Water Intake Structure Phase II Existing Facilities (Renewal).

ICR Numbers: EPA ICR No. 2060.04, OMB Control No. 2040–0257.

ICR Status: This ICR is currently scheduled to expire on August 31, 2010. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR Part 9, and displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR Part 9.

Abstract: The section 316(b) Phase II Existing Facility rule requires the collection of information from existing point source facilities that generate and transmit electric power (as a primary activity) or generate electric power but sell it to another entity for transmission, use a cooling water intake structure (CWIS) that uses at least 25 percent of the water it withdraws from waters of the U.S. for cooling purposes, and have a design intake flow of 50 million gallons per day (MGD) or more. Section 316(b) of the Clean Water Act (CWA) requires that any standard established under section 301 or 306 of the CWA and applicable to a point source must require that the location, design, construction and capacity of CWISs at that facility reflect the best technology available (BTA) for minimizing adverse environmental impact. Such impact occurs as a result of impingement (where fish and other aquatic life are trapped on technologies at the entrance.
