#### Energy Exchange, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

August 23, 2010.

On May 5, 2010, and amended on July 19, 2010, Energy Exchange, Inc. filed an application, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Bear Creek Hydroelectric Project (Bear Creek Project). The Bear Creek Project would be located at Bear Creek Dam Municipal Water System within the city of Astoria, Clatsop County, Oregon. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The Bear Creek Project would consist of: (1) The existing Bear Creek reservoir and two other reservoirs (known as # 2 and # 3); (2) the existing 21-inch diameter steel pipes; (3) two new powerhouses to be located at reservoir # 2 and reservoir # 3; (4) one 125-kilowatt (kw) turbine/generating unit, to be installed in each powerhouse; and (5) a new three-phase transmission line (voltage to be determined) to connect with the nearest tie-in point on a local electric grid system. The project would produce an estimated average annual generation of about 1,700 megawatt-hours.
