NUCLEAR REGULATORY COMMISSION

[NRC-2010-0287]

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance and availability of Draft Regulatory Guide, DG-8035, "Administrative Practices in Radiation Surveys and Monitoring."

FOR FURTHER INFORMATION CONTACT:

Harriet Karagiannis, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: (301) 251-7477 or e-mail Harriet.Karagiannis@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or

postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG) is temporarily identified by its task number, DG-8035, which should be mentioned in all related correspondence. DG-8035 is proposed Revision 1 of Regulatory Guide 8.2, dated August 1973. This guide provides general guidance that the staff of the NRC considers acceptable for the administrative practices associated with surveys and monitoring of ionizing radiation in licensed institutions, intended primarily for administrative and management personnel in organizations that are involved in, or are planning to initiate, activities involving the handling of radioactive materials or radiation.

The administrative requirements for radiation monitoring are mainly specified in Title 10 of the Code of Federal Regulations, part 20, "Standards for Protection against Radiation" (10 CFR part 20), and are applicable to all NRC-licensed activities. This part requires surveys in order to evaluate the significance of radiation levels that may be present. In addition, it requires radiation monitoring in order to obtain measurements for the evaluation of potential exposures and doses.

II. Further Information

The NRC staff is soliciting comments on DG-8035. Comments may be accompanied by relevant information or supporting data and should mention DG-8035 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC's Agencywide Documents Access and Management System (ADAMS).

Comments would be most helpful if received by October 29, 2010.

Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC-2010-0287 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site Regulations.gov. Because your comments will not be edited to remove
