SUPPLEMENTARY INFORMATION:

I. Abstract

Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implement the Paperwork Reduction Act of 1995 (Pub. L. 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d)). This notice identifies an information collection activity that the Office of the Secretary will submit to OMB for revision.

The Klamath River provides habitat for fall and spring run Chinook salmon (*Oncorhynchus tshawytscha*), coho salmon (*Oncorhynchus kisutch*), steelhead trout (*Oncorhynchus mykiss*), green sturgeon (*Acipenser medirostris*), Pacific lamprey (*Lampetra tridentate*), and Pacific eulachon (*Thaleichthys pacificus*). Some of these species are important components of non-tribal harvest (e.g., fall Chinook, steelhead), some have important subsistence and cultural value to Klamath Basin tribes (e.g., salmon, sturgeon, lamprey, eulachon), and some are at low levels of abundance or Endangered Species Act-listed (e.g., spring Chinook, lamprey, coho, eulachon). In addition to its importance as fish habitat, the Klamath River also provides water to agriculture through the Bureau of Reclamation's Klamath Irrigation Project.

Oversubscription of Klamath water has thwarted recovery of depressed fish stocks and led to economic hardship for farming and fishing communities—
