

b. Review Under the Regulatory Flexibility Act

This proposed rule has been reviewed under the Regulatory Flexibility Act (Pub. L. 96-354) which requires the preparation of a regulatory flexibility analysis for any regulation that will have a significant economic impact on a substantial number of small entities (*i.e.*, small businesses and small governments). Due to the nature of the waterway and the minimal historic use of this portion of Eagle Bay for travel, recreation or fishing, as well as the availability of an alternate channel within Knik Arm, the Corps expects that the economic impact of this portion of the restricted area would have practically no impact on the public and no anticipated navigational hazard or interference with existing waterway traffic, and accordingly, certifies that this proposed rule will have no significant economic impact on small entities.

c. Review Under the National Environmental Policy Act

Due to the administrative nature of this action and because there is no intended change in the use of the area, the Corps expects that this regulation, if adopted, will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement, for the establishment of this restricted area, is not required. An environmental assessment (EA) will be prepared after the public notice comment period is closed and all comments have been received and considered. After it is prepared, it may be reviewed at the District office listed at the end of the **FOR FURTHER INFORMATION CONTACT** section, above.

d. Unfunded Mandates Act

This proposed rule does not impose an enforceable duty upon the private sector. Therefore, it is not a Federal private sector mandate and is not subject to the requirements of Section 202 or 205 of the Unfunded Mandates Act. We have also found under Section 203 of the Act, that small Governments will not be significantly and uniquely affected by this rulemaking.

List of Subjects in 33 CFR Part 334

Danger zones, Marine safety, Navigation (water), Restricted areas, Waterways.

For the reasons stated in the preamble, the Corps proposes to amend 33 CFR part 334 as follows:

PART 334—DANGER ZONE AND RESTRICTED AREA REGULATIONS

1. The authority citation for 33 CFR part 334 continues to read as follows:

(b) *The regulations.* To ensure public safety, the restricted area shall be closed to all watercraft navigation and persons at all times, except for vessels and individuals engaged in operational and maintenance activities authorized by the Commander, U.S. Army Garrison Alaska.

(c) *Enforcement.* This regulation shall be enforced by the Commander, U.S. Army Garrison Alaska or other such agencies as the Commander may designate.

This extended comment period will afford greater opportunity to all interested parties to review and submit comments on the proposal.

DATES: Comments must be received on or before October 13, 2010.

ADDRESSES: Comments may be submitted by mail to: Water Docket, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. EPA-HQ-OW-2008-0878. Comments may also be submitted electronically or through hand delivery/courier by following the instructions provided in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: For technical inquiries, contact Sean Conley, Office of Ground Water and Drinking Water (MC 4607M), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone (202) 564-1781. SUPPLEMENTARY INFORMATION: The comment period for the proposed RTCR now ends on October 13, 2010. This is an extension of 30 days beyond the comment period established in the **Federal Register** on July 14, 2010. Anyone seeking to submit comments must follow the procedures specified in the **SUMMARY** section of the proposal as published in the **Federal Register** (75 FR 40926, July 14, 2010). The RTCR applies to all public water systems. The proposed revisions require systems that have an indication of coliform contamination in the distribution system to assess the problem and take corrective action that may reduce cases of illnesses and deaths due to potential fecal contamination and waterborne pathogen exposure. This proposal also establishes criteria for systems to qualify for and stay on reduced monitoring, thereby providing incentives for improved water system operation.

See the proposal as published in the **Federal Register** (75 FR 40926, July 14, 2010) for additional information regarding public health concerns, proposed regulatory requirements, implementation schedules, estimated costs and benefits, implementation tools, and other issues.
