Background: The President directed that the Commission be established to conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle. The Commission will provide advice and make recommendations on issues including alternatives for the storage, processing, and disposal of civilian and defense spent nuclear fuel and nuclear waste.

The Co-chairs of the Commission requested the formation of the T&S Subcommittee to answer the question: “[s]hould the US change the way in which it is storing used nuclear fuel and high level waste while one or more final disposal locations are established?”

Purpose of the Meeting: The purpose of the meeting is to hear from Federal, State and local officials, industry representatives, and others having expertise in siting interim storage facilities for spent fuel, and for other similar facilities.
