Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236, as detailed below.

[Docket Number FRA-2010-0130]

Applicant: Mr. Geoffrey P. Hubbs, Chief Engineer Signals, New Jersey Transit, One Penn Plaza East, Newark, New Jersey 07105-2246.

The New Jersey Transit (NJT) seeks approval of the proposed discontinuance and removal of six

power-operated derails at Lower Hack Interlocking at milepost (MP) 2.7 on the Morristown Line, Hoboken Division. The existing facility is a remotely-controlled movable bridge interlocking located within a traffic control system on either side of the bridge on three main tracks.

NJT is the owner and operator of the line. The Norfolk Southern Corporation and Morristown and Erie Railway, Inc. operate local freight service on this portion of the line.

The reason given for the proposed changes is to improve reliability and retire facilities no longer required for present train operations.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA-2010-0130) and may be submitted by any of the following methods:
