Abstract: The Energy Independence and Security Act of 2007 (EISA), enacted in December 2007, included a requirement that the National Highway Traffic Safety Administration (NHTSA) develop a national tire fuel efficiency program to educate consumers about the effect of tires on automobile fuel efficiency, safety and durability. A critical step in developing the consumer information program is to conduct proper market research to understand consumers’ knowledge of tire maintenance and performance, understand the tire purchase process from both the consumer and retailer’s perspectives, evaluate comprehension of ratings, exploring the clarity, meaningfulness and the likely resulting behaviors, and evaluating the creative and the channels for communication. NHTSA proposes a multi-phased research project to gather the data and apply analyses and results from the project to develop the consumer information program.

Number of Respondents: 73.

NHTSA will conduct two research phases. For the first phase, which this notice addresses, NHTSA will conduct two types of qualitative research. One research project will consist of two (2) focus groups in three (3) cities. Each group will have eight (8) participants and will last two (2) hours for a total of 96 participant hours. For the second research project in this phase, NHTSA will conduct on-site interviews at various tire retailers. NHTSA anticipates 25 respondents with each interview taking 25 minutes for a total of approximately 11 participant hours. The results of this research phase, as well as comments received to a separate notice, that will be published soon, will be used to finalize the content of an online survey NHTSA will conduct in the second research phase.

The estimated annual burden hour for the first phase of research is 107 hours. Based on the Bureau of Labor and Statistics’ median hourly wage (all occupations) in the May 2009 National Occupational Employment and Wage Estimates, NHTSA estimates that it will take an average of $15.95 per hour for professional and clerical staff to gather data, distribute and print material. Therefore, the agency estimates that the cost associated with the burden hours is $1,706.65 ($15.95 per hour × 107 burden hours).

Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued on: August 30, 2010.

DEPARTMENT OF TRANSPORTATION
National Highway Traffic Safety Administration
Reports, Forms, and Recordkeeping Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Request for public comment on proposed collection of information.

SUMMARY: Before a Federal agency can collect certain information from the public, it must receive approval from the Office of Management and Budget (OMB). Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections.

This document describes one collection of information for which NHTSA intends to seek OMB approval.

DATES: Comments must be received on or before November 2, 2010.

ADDRESS: You may submit comments, identified by the docket number in the heading of this document, by any of the following methods:

- Federal eRulemaking Portal: Go to http://www.regulations.gov. Follow the instructions for submitting comments on the electronic docket site by clicking on “Help” or “FAQ.”
- Hand Delivery: 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except Federal holidays.

Regardless of how you submit comments, you should mention the docket number of this document.

You may call the Docket Management Facility at 202–366–9826.

Instructions: For detailed instructions on submitting comments and additional information on the rulemaking process, see the Public Participation heading of the Supplementary Information section of this document. Note that all comments received will be posted without change to http://www.regulations.gov, including any personal information provided.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the Federal Register published on April 11, 2000 (65 FR 19477–78) or you may visit http://www.dot.gov/privacy.html.

Docket: For access to the docket to read background documents or comments received, go to http://www.regulations.gov, or the street address listed above. Follow the online instructions for accessing the dockets.

FOR FURTHER INFORMATION CONTACT: Kil-Jae Hong, NHTSA, 1200 New Jersey Avenue, SE., W52–232, NPO–520, Washington, DC 20590. Ms. Hong’s telephone number is (202) 493–0524.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the Federal Register providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB’s regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following:

(i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
(ii) The accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
(iii) How to enhance the quality, utility, and clarity of the information to be collected;
(iv) How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic,
mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB:

Title: 49 CFR 575—Consumer Information Regulations (sections 103 and 105) Qualitative Research.

OMB Control Number: Not Assigned.

Form Number: None.

Affected Public: Passenger vehicle consumers.

Requested Expiration Date of Approval: Three years from approval date.

Abstract: The Energy Independence and Security Act of 2007 (EISA), enacted in December 2007, included a requirement that the National Highway Traffic Safety Administration (NHTSA) develop a consumer information and education campaign to improve consumer understanding of automobile performance with regard to fuel economy, Greenhouse Gases (GHG) emissions and other pollutant emissions; of automobile use of alternative fuels; and of thermal management technologies used on automobiles to save fuel. A critical step in developing the consumer information program is to conduct proper market research to understand consumers' knowledge surrounding these issues, evaluate potential consumer-facing messages in terms of clarity and understand the communications channels in which these messages should be present. The research will allow NHTSA to refine messaging to enhance comprehension and usefulness and will guide the development of an effective communications plan. NHTSA proposes a multi-phased research project to gather the data and apply analyses and results from the project to develop the consumer information program and education campaign.

Estimated Annual Burden: 128.

Number of Respondents: 64.

NHTSA will conduct two research phases. For the first phase, which this notice addresses, NHTSA will conduct one type of qualitative research. This research project will consist of two (2) focus groups in four (4) cities. Each group will have eight (8) participants and will last two (2) hours for a total of 128 participant hours. The results of this research phase, as well as comments received to a separate notice published today, will be used to finalize the content of an online survey NHTSA will conduct in a second research phase. The estimated annual burden hour for the first phase of research is 128 hours. Based on the Bureau of Labor and Statistics’ median hourly wage (all occupations) in the May 2009 National Occupational Employment and Wage Estimates, NHTSA estimates that it will take an average of $15.95 per hour for professional and clerical staff to gather data, distribute and print material. Therefore, the agency estimates that the cost associated with the burden hours is $2,041.60 ($15.95 per hour × 128 burden hours).

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236, as detailed below.

Docket Number FRA–2010–0134

Applicant: Mr. James V. Samuelson, Deputy General Manager—Safety & Training, New Jersey Transit, One Penn Plaza East, Newark, New Jersey 07105–2246.

The New Jersey Transit (NJT) seeks relief from the 2 year periodic testing requirements of the Rules, Standards, and Instructions, Title 49 CFR part 236, §§ 236.377 Approach Locking, 236.378 Time Locking, 236.379 Route Locking, 236.380 Indication Locking, and 236.381 Traffic Locking, on vital microprocessor-based systems. NJT proposes to verify and test signal locking systems controlled by microprocessor-based equipment by use of alternative procedures every 4 years after initial baseline testing or program change as follows:

• Verifying of the Cyclic Redundancy Check (CRC)/Check Sum/Universal Control Number (UNC) of the existing location’s specific application logic to the previously tested version.
• Testing the appropriate interconnection to associated signaling hardware equipment outside the processor (switch indication, track indication, signal indication, approach locking (if external)) to verify correct and intended inputs to and outputs from the processor are maintained.
• Analyzing and comparing the results of the 4 year alternative testing with the results of the baseline testing performed at the location and submit the results to FRA.
• All records of locking tests will identify the method used (i.e., conventional, baseline, or subsequent alternative method).

Applicant’s justification for relief: Many of NJT’s interlocking, controlled points and other locations are controlled by solid-state vital microprocessor-based systems. These systems utilize programmed logic equations in lieu of relays and other mechanical components for control of both vital and non-vital functions. The logic does not change once a microprocessor-based system has been tested. Locking tests are documented on installation.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA–2010–0134) and may be submitted by any of the following methods:

• Web site: http://www.regulations.gov. Follow the online instructions for submitting comments.
• Fax: 202–493–2251.
• Mail: Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE, Room W12–140, Washington, DC 20590.
