What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Affected entities: Entities potentially affected by this action are elementary

and middle school students, parents, and educators (informal and external educators).

Title: The SunWise Program.

ICR numbers: EPA ICR No. 1904.06, OMB Control No. 2060-0439.

ICR status: This ICR is currently scheduled to expire on 02/28/2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The goal of the SunWise School Program is to teach children and their caregivers how to protect themselves from overexposure to the sun. The SunWise Program recognizes the challenge of measuring the progress and evaluating the effectiveness of an environmental and public health education program where the ultimate goal is to reduce risk and improve public health. Therefore, the continual and careful evaluation of program effectiveness through a variety of means, including data from pre- and post-intervention surveys, tracking and monitoring of classroom activities and school policies, and advisory board meetings, is necessary to monitor progress and refine the program. Surveys to be developed and administered include: (1) Teacher questionnaire for measuring their and their students' receptivity to the educational component of the Program; and (2) Teacher survey component soliciting information about the development of a recognition and incentives program. The data will be analyzed and results will indicate the Program's effect on participants' sun-protection attitudes and behaviors, and will help guide the program's further improvement. Additionally, information is collected when educators sign up to receive a Tool Kit either on the Web or in person, and when individuals participate in an on-line sun safety tutorial/certification program. Responses to the collection of information are voluntary. All responses to the collection of information remain anonymous and confidential.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 10 to 30 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's annual estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 5,800.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 1,248 hours.

Estimated total annual costs:

\$82,423.88. This does not include an estimated burden cost of \$61,552.96 and an estimated cost of \$100,000 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

Yes. Hours were removed for the certification program collection include in the previous ICR. Fewer hours for EPA are anticipated for the survey work due to a decreased level of sophistication in the analysis and decreased effort being needed to solicit survey responses. More hours were added for teachers completing the educator survey and administering the student survey. Finally, registering such a large number of teachers has resulted in more hours needed at EPA. Hours and burden for educators is about the same; hours for students has also decreased significantly. The bottom line burden hours increased along with the total cost.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue

another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 26, 2010.

Kristinn Vazquez,

Acting Director, Stratospheric Protection Division, Office of Air and Radiation.
