

recreation resources, trends in uses of those resources, and a basis for developing and evaluating programs and projects to meet existing and future needs.

We collect the information in conjunction with carrying out our responsibilities under the Federal Aid in Sport Fish Restoration Act (16 U.S.C. 777-777M), commonly referred to as the Dingell-Johnson Act, and the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669-669i), commonly referred to as the Pitman-Robertson Act. Under these acts, as amended, we provide approximately \$800 million in grants annually to States for projects that support sport fish and wildlife management and restoration, including:

- Improvement of fish and wildlife habitats,
- Fishing and boating access,
- Fish stocking, and
- Hunting and fishing opportunities.

We also provide grants for aquatic education and hunter education, maintenance of completed projects, and research into problems affecting fish and wildlife resources. These projects help to ensure that the American people have adequate opportunities for fish and wildlife recreation.

We conduct the survey about every 5 years. The 2011 FHWAR will be the 12th conducted since 1955. We sponsor the survey at the States' request, which is made through the Association of Fish and Wildlife Agencies. The Census Bureau collects the information using computer-assisted telephone or in-person interviews. The Census Bureau will select a sample of sportspersons and wildlife watchers from a household screen and conduct three detailed interviews during the survey year. The survey collects information on the number of days of participation, species of animals sought, and expenditures for trips and equipment. Information on the characteristics of participants includes age, income, sex, education, race, and residency.

The applicant requests a permit renewal and amendment to take (capture, temporarily hold, and release) Indiana bats (*Myotis sodalis*) and gray bats (*Myotis griseescens*) in Missouri. Proposed activities include population monitoring, sampling and laboratory experimentation to investigate white-nose syndrome in the interest of enhancement of survival of the species in the wild.

**Permit Application Number:** TE151109.  
**Applicant:** Ohio Department of Natural Resources, Division of Wildlife, Columbus, OH.

The applicant requests a permit renewal and amendment to take (capture and release; capture and hold in captivity for propagation) American burying beetle (*Nicrophorus americanus*) in Ohio. Federally-listed in the future. The rattlesnake is currently a Federal candidate species. Take associated with the permit may result from habitat management actions for the species at the Wisconsin Department of Natural Resources' Tiffany State Wildlife Area. These activities are described in the Eastern Massasauga Rattlesnake Candidate Conservation Agreement with Assurances for the Lower Chippewa River Bottoms, Buffalo and Pepin Counties, Wisconsin (EMR CCAA). The EMR CCAA agreement is a 10-year agreement between the U.S. Fish and Wildlife Service and the Wisconsin DNR. The permit application, the EMR CCAA, and the Environmental Assessment applicable to this application are available for review on the Service's Web site at: <http://www.fws.gov/midwest/endangered/lists/candidat.html>. The purpose of the proposed activities is enhancement of the survival of the species in the wild.
