NUCLEAR REGULATORY COMMISSION

[Docket No. 030–20836, License No. 25–21479–01, NRC–2009–0120, A–10–028]

In the Matter of Mark M. Ficek; Order Prohibiting Involvement in NRC-Licensed Activities (Effective Immediately)

Mr. Mark M. Ficek is the President, owner, and former radiation safety officer (RSO) of Mattingly Testing Services, Inc. (Mattingly or Licensee). Mattingly is the holder of Materials License 25–21479–01 issued by the

Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR Part 34, last amended on May 28, 2010, to change the facility's permanent storage location and name a new radiation safety officer, and due to expire on February 28, 2016. The license authorizes Mattingly to possess and use byproduct material for industrial radiography operations in NRC jurisdiction and in areas of exclusive Federal jurisdiction within Agreement States. The license currently authorizes storage at licensee facilities in Molt and Billings, Montana. The license further authorizes the possession of natural or depleted uranium, as solid metal, for shielding in radiography equipment. On the same date this Order (IA–10–028) is issued to Mr. Ficek, the NRC is also issuing Mattingly an Order Revoking License (Effective Immediately) (EA–10–100).

Currently, both Mr. Ficek (IA–08–055) and Mattingly (EA–08–271) are subject to Confirmatory Orders issued on March 6, 2009, which resulted from alternative dispute resolution (ADR) mediation sessions conducted on February 5, 2009. Those Orders were made immediately effective upon issuance. The ADR mediation session and resultant Confirmatory Orders dispositioned nine violations, five of which were willful, identified during an NRC inspection and an investigation by the NRC's Office of Investigations. The 2008 investigation identified several violations: (1) A failure to provide complete and accurate information to the NRC; (2) a radiographer assistant performing radiographic operations without a dosimeter; (3) a radiographer assistant using a radiographic exposure device without supervision of a radiographer; (4) failure to secure a radiographic exposure device with a minimum of two independent physical controls; (5) failure to remove a radiographic exposure device from service after it had sustained damage to the locking mechanism; (6) failure to notify the NRC after discovery of damage to a radiographic exposure device; (7) an individual acting as a radiographer assistant without completing a practical examination on the use of the radiography equipment; (8) failure to ensure that all personnel dosimeters were checked for proper response to radiation every 12 months; and (9) failure to have a functional alarm system to allow the licensee to monitor, detect, assess, and respond to unauthorized access to radioactive material when the radioactive material is not under direct observation by Mattingly staff and stored in a portable
