SUPPLEMENTARY INFORMATION:

I. Background

This is a request for the Department of Labor, Employment and Training Administration's (ETA) request to continue the reporting and recordkeeping requirements of the YouthBuild (YB) program. This reporting structure features standardized data collection for program participants and quarterly progress and Management Information System (MIS)

report formats. All data collection and reporting is done by YouthBuild grantees.

The quarterly progress reports provide a detailed, narrative account of program activities, accomplishments, and progress toward performance outcomes during the quarter. The quarterly performance reports include aggregate and participant-level information on demographic characteristics, types of services received, placements, outcomes, and follow-up status. Specifically, these reports collect data on individuals who receive education, occupational skill training, leadership development services, and other services essential to preparing at-risk youth for high-wage, high-demand occupations through YouthBuild programs.

The accuracy, reliability, and comparability of program reports submitted by grantees using federal funds are fundamental elements of good public administration and are necessary tools for maintaining and demonstrating system integrity. The use of a standard set of data elements, definitions, and specifications at all levels of the workforce system helps improve the quality of performance information that is received by ETA.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- * Enhance the quality, utility, and clarity of the information to be collected; and

- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses

The following determinations terminating investigations were issued because the petitioner has requested that the petition be withdrawn.
