

After publishing notice of its intent to revise this collection,⁴ the Commission submitted its request for revision to OMB on July 20, 2010. The revision was requested to both extend the expiration date of the collection and to eliminate the now obsolete early clearing mechanism. This revised collection, without the early clearing mechanism and its associated responses and burden hours, is identical to the previous collection in all other respects. The Office of Management and Budget approved this revised collection on August 27, 2010.

As noted previously, this information collection will be used to ensure that these microphones do not continue to be used or continue to be made available for use in the United States in the 700 MHz Band, in contravention of the steps taken by the Commission to make the 700 MHz Band available for use by public safety entities and commercial licensees, and to provide them a home in the core TV spectrum.

The Commission recognizes that a significant number of currently unauthorized users of wireless microphones and other low power auxiliary stations in the 700 MHz Band may have to purchase new equipment to transition into the core TV bands pursuant to our temporary waivers. Our intention in requiring display of the Consumer Disclosure is to make certain that these users understand their rights and obligations regarding the use of low power auxiliary stations in the core TV bands. This Consumer Disclosure should help assure that purchasers of low power auxiliary stations operate their devices in a manner in compliance with our rules and policies and thereby do not cause interference to authorized radio services in the core TV bands.

Secretary.
