Dated at Rockville, Maryland, this 10th day of September, 2010.

On September 10, 2010, the NRC approved and issued Amendment No. 203 to Operating License No. DPR–61, held by CYAPC for the possession of the Haddam Neck facility pursuant to 10 CFR Part 50 and for the receipt, possession, and use of byproduct, source, and special nuclear material in accordance with 10 CFR parts 30, 40, and 70. Amendment No. 203 is effective as of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment No. 203 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC’s rules and regulations. As required by the Act and the NRC’s rules and regulations in 10 CFR Chapter I, the NRC has made appropriate findings, which are set forth in Amendment No. 203 Safety Evaluation Report (SER). The issuance of Amendment No. 203 satisfied the criteria specified in 10 CFR 51.22(c)(10)(ii) for a categorical exclusion. Thus, the preparation of an environmental assessment or an environmental impact statement is not required.

The NRC has prepared a SER that documents the staff’s review and evaluation of the amendment. In accordance with 10 CFR 2.390 of NRC’s “Rules of Practice,” final NRC records and documents related to this action, including the application for amendment and supporting documentation and the SER, are available electronically at the NRC’s Electronic Reading Room, at: http://www.nrc.gov/reading-rm/adams.html. From this site, you can access NRC’s Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC’s public documents.
