Notice To Rescind a Notice of Intent To Prepare a Supplemental Environmental Impact Statement (SEIS): Route 475 (Knoxville Parkway), From Interstate 75 South of Knoxville to Interstate 75 North of Knoxville, Loudon, Knox, and Anderson Counties, TN

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The Federal Highway Administration (FHWA) is issuing this notice to advise the public that the Notice of Intent published on November 4, 2005 to prepare a SEIS for the proposed Route 475 (Knoxville Parkway) from Interstate 75 south of Knoxville to Interstate 75 north of Knoxville, Loudon, Knox, and Anderson Counties, Tennessee, is being rescinded.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Tennessee Department of Transportation, is rescinding the notice of intent to prepare a SEIS for the proposed Route 475 (Knoxville Parkway) from Interstate 75 south of Knoxville to Interstate 75 north of Knoxville, Loudon, Knox, and Anderson Counties, Tennessee. The proposed project was approximately 36 miles in length.

The project as described in the December 18, 2001 Draft Environmental Impact Statement (DEIS) was proposed to improve the regional transportation system in the area.

Since the original Draft Environmental Impact was approved, the alternative development and screening process for the project has continued through a Context Sensitive Solution Process (CSS). This CSS process identified new alternatives to follow the general alignment of the Orange alternative, but had been shifted at various locations based on input from the CSS process. In addition, the number and type of access points along the route have been modified. The purpose of the SDEIS was to study and develop the new alternatives. The No-Build and three Build Alternatives were proposed to be studied in the SDEIS.

Revised traffic projections show a much lower level of traffic using the new proposed Route 475 (Knoxville Parkway) and a smaller diversion of traffic from Interstate 40 and Interstate 75 than was originally projected. In addition, the estimated cost of approximately one billion dollars was determined to be prohibitive.

To ensure that the full range of issues related to this proposed action are identified and taken into account, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action should be directed to the FHWA contact person identified above at the address provided above.

DEPARTMENT OF TRANSPORTATION
National Highway Traffic Safety Administration

[Federal Register Vol. 75, No. 182 / Tuesday, September 21, 2010 / Notices 57549]

Fisker Automotive; Grant of Application for Temporary Exemption From Advanced Air Bag Requirements of FMVSS No. 208

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

SUMMARY: This notice grants the petition of Fisker Automotive Corporation (Fisker) from certain advanced air bag requirements of FMVSS No. 208, for the Karma model. The basis for the application is that compliance would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard. This action follows our publication in the Federal Register of a document announcing receipt of Fisker’s petition and soliciting public comments.

DATES: The exemption is effective immediately and remains in effect until September 21, 2011.

SUPPLEMENTARY INFORMATION:

I. Advanced Air Bag Requirements and Small Volume Manufacturers

In 2000, NHTSA upgraded the requirements for air bags in passenger cars and light trucks, requiring what are commonly known as “advanced air bags.” The upgrade was designed to meet the goals of improving protection for occupants of all sizes, belted and unbelted, in moderate-to-high-speed crashes, and of minimizing the risks posed by air bags to infants, children, and other occupants, especially in low-speed crashes.

The advanced air bag requirements were a culmination of a comprehensive plan that the agency announced in 1996 to address the adverse effects of air bags. This plan also included an extensive consumer education program to
