

OMB is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: On behalf of DHS, IP manages the Department's program to protect the Nation's 18 Critical Infrastructure and Key Resources (CIKR) Sectors by implementing the National Infrastructure Protection Plan (NIPP). Pursuant to Homeland Security Presidential Directive—7 (HSPD—7) (December 2003), each sector is assigned an SSA to oversee Federal interaction with the array of sector security partners, both public and private. An SSA is responsible for leading a unified public-private sector effort to develop, coordinate, and implement a comprehensive physical, human, and cybersecurity strategy for its assigned sector. The SSA EMO, within IP, executes the SSA responsibilities for the six CIKR sectors assigned to IP: Chemical; Commercial Facilities; Critical Manufacturing; Dams; Emergency Services; and Nuclear Reactors, Materials, and Waste (Nuclear).

The mission of the SSA EMO is to enhance the resiliency of the Nation by leading the unified public-private sector effort to ensure its assigned CIKR are prepared, more secure, and safer from terrorist attacks, natural disasters, and other incidents. To achieve this mission, SSA EMO leverages the resources and knowledge of its CIKR sectors to develop and apply security initiatives that result in significant, measurable benefits to the Nation.

Each SSA EMO branch builds sustainable partnerships with its public and private sector stakeholders to enable more effective sector coordination, information sharing, and

program development and implementation. These partnerships are sustained through the Sector Partnership Model, described in the 2009 NIPP, pages 18–20.

Information sharing is a key component of the NIPP Partnership Model, and DHS-sponsored conferences are one mechanism for information sharing. To facilitate conference planning and organization, the SSA EMO plans to establish an event registration tool for use by all of its branches. The information collection is voluntary and will be used by the SSAs within the SSA EMO. The six SSAs within the SSA EMO will use this information to register public and private sector stakeholders for meetings hosted by the SSA. The SSA EMO will use the information collected to reserve space at a meeting for the registrant; contact the registrant with a reminder about the event; develop meeting materials for attendees; determine key topics of interest; and efficiently generate attendee and speaker nametags. Additionally, it will allow the SSA EMO to have a better understanding of the organizations participating in the CIKR protection partnership events. By understanding who is participating, the SSA can identify portions of a sector that are underrepresented, and the SSA could then target underrepresented sector elements through outreach and awareness initiatives.
