

exemption that will be issued as part of the letter to the licensee approving the exemption to 10 CFR Part 50, Appendix R, Section III.G.2.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

Based on the nature of the exemption, the proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity or the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historic and cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or different types of non-radiological environmental impacts are expected as a result of the proposed action. Accordingly, the NRC staff concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would not result in a decrease in current environmental impacts. If the proposed action was denied, the licensee would have to perform plant modifications to achieve compliance. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for PBAPS Unit Nos. 1, 2, and 3, dated April 1973, and for PBAPS Unit Nos. 2 and 3, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," (NUREG-1437, Supplement 10), dated January 2003.

Agencies and Persons Consulted

In accordance with its stated policy, on September xx, 2010, the NRC staff consulted with the Pennsylvania State official, Bradley Fuller, of the Pennsylvania State Department of Environmental Protection, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated March 6, 2009, as supplemented on February 12, 2010 (ADAMS Accession Nos. ML090680141 and ML100470774, respectively). SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated June 12, 2008, to the U.S. Nuclear Regulatory Commission (NRC), AREVA NP, Inc. (AREVA) requested approval of an amendment to its Special Nuclear Material License No. SNM-1227 which would authorize AREVA to install and operate a new process at its fuel fabrication facility in Richland, Washington, that will use supercritical carbon dioxide to extract uranium from waste material that contains a relatively low percentage of uranium. This submittal was revised and resubmitted by AREVA on August 22, 2008, to reflect the required portion marking set forth in Title 10 of the Code of Federal Regulations (10 CFR) 2.390(b). Pursuant to the requirements in 10 CFR 2.106, the NRC is providing notice that Amendment No. 1 for Special Nuclear Material License No. SNM-1227 has been issued. AREVA's request for the proposed amendment was previously noticed, and an opportunity to request a hearing was provided in the **Federal Register** on January 16, 2009 (74 FR 3110-3114). The NRC staff evaluated AREVA's license amendment request and concluded that it meets the regulatory criteria for a categorical exclusion, as described in 10 CFR 51.22(c)(11). This conclusion is documented in the NRC staff's Safety Evaluation Report (SER).

This license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and NRC's rules and regulations as set forth in 10 CFR Chapter 1. Accordingly, this license was amended on July 28, 2010, and is effective immediately.

II. Further Information

The NRC has prepared an SER that documents the information that was reviewed and the NRC's conclusion. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," details with respect to this action, including the SER and accompanying documentation included in the license package, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>.
