Federal Aviation Administration

14 CFR Part 47

RIN 2120–AI89

Re-Registration and Renewal of Aircraft Registration; OMB Approval of Information Collection; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; approval of information collection; correction.

SUMMARY: The FAA is correcting the notification of the Office of Management and Budget (OMB) approval of information collection requirements contained in the “Re-Registration and Renewal of Aircraft Registration” final rule. The final rule was published on July 20, 2010. The notification of OMB approval of information collection was published on August 30, 2010. This document corrects the OMB approval expiration date referenced in the August 30, 2010, notification.

DATES: The final rule, including the information collection requirements in part 47, published July 20, 2010, at 75 FR 41968, and August 20, 2010, at 75 FR 52859, will become effective on October 1, 2010. The FAA received OMB approval for the information collection requirements on August 16, 2010.

FOR FURTHER INFORMATION CONTACT: John G. Bent, Civil Aviation Registry, Mike Monroney Aeronautical Center, 6500 South MacArthur Boulevard, Oklahoma City, OK 73169; telephone: (405) 954–4331.

SUPPLEMENTARY INFORMATION:

Background

On July 20, 2010, the FAA published the final rule “Re-Registration and Renewal of Aircraft Registration” (75 FR 41968).

The final rule contained information collection requirements in part 47 that had not yet been approved by OMB at the time of publication. In accordance with the Paperwork Reduction Act, the FAA submitted a copy of the new information collection requirements to OMB for its review. OMB approved the collection on August 16, 2010, and assigned the information collection OMB Control Number 2120–0729, which expires on February 29, 2012. In the notification of OMB approval document that was published on August 30, 2010, the FAA incorrectly stated that the expiration date was February 29, 2010. The FAA also incorrectly referenced docket number FAA–2008–0118 instead of docket number FAA–2008–0118. The FAA also inadvertently included references to parts 13 and 91 in the heading of the document; however, parts 13 and 91 did not contain information collection requirements.

In final rule FR Doc. 2010–21561 published on August 30, 2010 (75 FR 52859), make the following corrections:

Corrections to Preamble

1. On page 52859, in the second column, in the third line of the heading, remove “14 CFR Parts 13, 47, and 91” and add in its place “14 CFR Part 47.”
DEPARTMENT OF ENERGY
Federal Energy Regulatory Commission

18 CFR Part 35
[Docket No. RM10–22–000; Order No. 739]

Promoting a Competitive Market for Capacity Reassignment

September 20, 2010.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission lifts the price cap for all electric transmission customers reassigning transmission capacity based on the Commission’s experience to date and a two-year study, released April 15, 2010. The removal of the price cap is intended to help facilitate the development of a market for electric transmission capacity reassignments as a competitive alternative to transmission capacity acquired directly from the transmission owner.

DATES: Effective Date: This rule will become effective September 24, 2010.

SUPPLEMENTARY INFORMATION: Before Commissioners: Jon Wellinghoff, Chairman; Marc Spitzer, Philip D. Moeller, John R. Norris, and Cheryl A. LaFleur.

1. Based on the Commission’s experience to date and a two-year study, released April 15, 2010, ¹ the Federal Energy Regulatory Commission in this Final Rule makes permanent the lifting of price caps for transmission customers reassigning electric transmission capacity. This action is intended to facilitate the development of a market for electric transmission capacity reassignments as a competitive alternative to primary transmission capacity.

I. Background

2. In Order No. 888, the Commission concluded that a transmission provider’s pro forma Open Access Transmission Tariff (OATT) must permit explicitly the voluntary reassignment of all or part of a holder’s firm point-to-point capacity rights to any eligible customer. ² The Commission also found that allowing holders of firm transmission capacity rights to reassign transmission capacity would help parties manage the financial risks associated with their long-term commitment, reduce the market power of transmission providers by enabling customers to compete, and foster efficient transmission capacity allocation.

3. With respect to the appropriate rate for transmission capacity reassignment, the Commission concluded it could not permit reassignments at market-based rates because it was unable to determine that the market for reassigned transmission capacity was sufficiently competitive so that resellers would not be able to exert market power. Instead, the Commission capped the rate at the highest of: (1) The original transmission rate charged to the purchaser (assignor); (2) the transmission provider’s maximum stated firm transmission rate in effect at the time of the reassignment; or (3) the assignor’s own opportunity costs capped at the cost of expansion (price cap). The Commission further explained that opportunity cost pricing had been permitted at “the higher of embedded costs or legitimate and verifiable opportunity costs, but not the sum of the two (i.e., ‘or’ pricing is
