I. Regulatory History

We did not publish a notice of proposed rulemaking (NPRM) for this rule. Under 5 U.S.C. 553(b)(A) and (b)(B), we find that this rule is exempt from notice and comment rulemaking requirements because these changes involve rules of agency organization, procedure, or practice. In addition, good cause exists for not publishing an NPRM for all revisions in the rule because the revisions are all non-substantive changes. This rule consists only of corrections and editorial, organizational, and conforming amendments. These changes will have no substantive effect on the public; therefore, it is unnecessary to publish an NPRM. Under 5 U.S.C. 553(d)(3), the Coast Guard finds that, for the same reasons, good cause exists for making this rule effective upon publication in the **Federal Register**.

II. Background

Each year the printed edition of Title 46 of the Code of Federal Regulations is recodified on October 1. This rule, which becomes effective September 29,

2010, makes technical and editorial corrections throughout Title 46. This rule does not create any substantive requirements.

III. Discussion of Rule

This rule revises 46 Part 1 by deleting all references to “Assessment, Integration and Risk Management Directorate (CG–51),” as this directorate no longer exists.

This rule revises 46 Part 1 by deleting all references to “Office of Waterways Management (CG–541),” as this office no longer exists.

This rule revises 46 Part 1 by adding a reference to the “Office of International and Domestic Port Security (CG–541).” This new office was created under the existing Prevention Policy Directorate (CG–54).

This rule revises 46 Part 1 by adding a reference to “Marine Transportation Systems Management Directorate (CG–55).” This new directorate was created to manage the Coast Guard’s portfolio of waterways management programs and assets and will coordinate Coast Guard activities to promote development of national and international consensus on waterways, management policies, goals, objectives, and strategies.

In addition, this rule revises 46 Part 1 by adding references to “Office of Bridge Programs (CG–551),” “Office of Marine Transportation Systems (CG–552),” and “Office of Navigation Systems (CG–553).” These new offices were created under the Marine Transportation Systems Management Directorate (CG–55).

This rule revises 46 CFR Part 2 by eliminating the requirement that an inspector must complete and submit “Form CG–858, Certificate of Inspections Amendment,” to amend a vessel’s Certificate of Inspection. The paragraph will clarify that the original Certificate of Inspection may be amended and re-issued with the original renewal date pending approval of the Officer in Charge, Marine Inspection.

This rule revises 46 CFR Part 2 by removing references to a Letter of Compliance and to a Tank Vessel Examination Letter and replacing them with a reference to a Certificate of Compliance. Letters of Compliance and Tank Vessel Examination Letters are no longer issued, and were combined to form Certificates of Compliance in the mid-1990s. It also clarifies the office and the appropriate chain of command for actions regarding vessel fees.

This rule revises 46 CFR Part 2 by clarifying the chain-of-command procedure in various instances without making changes to the chain of command.

This rule revises 46 CFR Part 2 to add that a credit card or wire transfer is an acceptable form of payment for all fees required by subpart 2.10.

This rule revises 46 CFR Part 2 to update the address for mailing a payment made by check for vessel inspection and to add a new address for mailing a payment using a credit card.

This rule revises 46 CFR Part 2 to remove “midperiod” and add, in its place, “annual and periodic” to more accurately describe the period between inspections.

This rule revises 46 CFR Part 7 by correcting grammatical errors.

This rule revises 46 CFR Part 9 to remove “steamship,” as this is an outdated term which is no longer used to describe vessels.

This rule revises 46 CFR Part 10 to correct a table titled “Table 10.215(a)—Medical and Physical Requirements for Mariner Endorsement,” in which four pieces of data are located in the wrong columns.

This rule revises 46 CFR Part 28 to update the delegation of authority from the Secretary of Transportation to the Secretary of Homeland Security in an instance where it had not already been changed.

This rule revises 46 CFR Parts 31 and 70 to capitalize the word “office” in “Office of the Commandant.”

This rule revises 46 CFR Part 54 to remove a redundant paragraph and replace it with the paragraph originally intended. The 2009 CFR included similar paragraphs describing the pressure measurement restrictions for condensers and heat exchangers eligible for exemption from shop inspection. This rule removes the less specific, earlier version of the paragraph at § 54.01–15(a)(5) and leaves the more recently updated version of the paragraph, redesignating it as § 54.01–15(a)(5) from § 54.01–15(a)(4). This rule returns the original paragraph at § 54.01–15(a)(4) regarding Class I, II, and III pressure vessels, to its intended place. The original paragraph was present in the 2008 CFR but erroneously omitted from the 2009 publication.

This rule revises 46 CFR Part 129 to replace the word “part” with the word “subchapter” where “subchapter” is intended.

This rule revises 46 CFR Part 150 to correct a table with mislabeled footnotes.

This rule revises 46 CFR Part 154 to remove a redundant section at § 154.30.

This rule corrects 46 CFR Part 177 to make the metric value of 15 feet accurate. The section currently lists the metric value of 15 feet at 3.8 meters. This rule changes the metric value to

4.572 meters in every instance, ensuring consistency between the values when expressed in both metric and imperial units.

This rule updates various addresses for Coast Guard offices throughout Title 46 so that they conform to new mailing addresses and mailing address formats that came into use on June 15, 2009. This rule also updates internal Coast Guard office designators, as well as certain organizational titles, throughout Title 46. Changes in organizational titles included in this rule are only technical revisions reflecting changes in agency procedure and organization, and do not indicate new authorities.

Throughout Title 46, this rule removes all references to Loran towers and coordinates, which are no longer in use, and changes all references to Search and Rescue Transponders (SARTs) to Search and Rescue Transmitters (SARTs), as transponders are no longer in use.

This rule updates various citations to the CFR that were overlooked in past revisions of Title 46.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 12 of these statutes or executive orders.

A. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review. The Office of Management and Budget has not reviewed it under that Order. Because this rule involves non-substantive changes and addresses internal agency practices and procedures, it will not impose additional costs on the public.

B. Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

We estimate that this rule will not impose additional costs and should have little or no impact on small entities because the provisions of this rule are technical and non-substantive. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this final rule

will not have a significant economic impact on a substantial number of small entities.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

G. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

H. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

I. Indian Tribal Governments

This rule does not have Tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian

Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

J. Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

K. Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

L. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded under section 2.B.2, figure 2–1, paragraph (34)(a) of the Instruction. This rule involves regulations that are editorial and procedural, such as those updating addresses or establishing application procedures. An

environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under **ADDRESSES**.

Office of the Secretary

49 CFR Part 71

[OST Docket No. OST–2010–0046]

Relocation of Standard Time Zone Boundary in the State of North Dakota: Mercer County

AGENCY: Office of the Secretary, Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: DOT is moving all of Mercer County, North Dakota to the central time zone. Prior to this action, all of Mercer County was located in the mountain time zone. This action is taken in response to a petition filed by the Board of County Commissioners for Mercer County and is based on comments made at a public hearing and filed in the docket.

DATES: *Effective Date:* This final rule will be effective November 7, 2010.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, U.S. Department of Transportation, Room W94–302, 1200 New Jersey Avenue, SE., Washington, DC 20590, (202) 366–9310, bob.ashby@dot.gov.

SUPPLEMENTARY INFORMATION:

Background

For more than a century, time zone boundaries in North Dakota have had an interesting and varied history. Beginning in 1883, mountain time was observed in the southwest portion of the State and a few locations in the northwest, with central time being used elsewhere. In 1929, the Interstate Commerce Commission (ICC), which then had jurisdiction over time zone boundaries, extended central time to cover all but a cluster of counties in the southwest corner of the State. Congress transferred the ICC’s time zone boundary powers to the Department of Transportation (DOT) in 1967. DOT exercises these powers under the provisions of the Uniform Time Act of 1966 (15 U.S.C. 260–64).

The Department has exercised its authority under this statute in several proceedings affecting North Dakota. In 1968, in response to a petition from the Governor of North Dakota, the Department placed 14 counties lying south and west of the Missouri River into mountain time. The change was made to accommodate the historical pattern of time observance in the State. In 1992, in response to a petition from

the Board of Commissioners of Oliver County (which is adjacent to Mercer County), the Department moved that county into the central time zone. The Department took similar action with respect to Morton County and a portion of Sioux County in 2003.

In 2000–2003, the Department considered a petition from the Mercer County Commission to move the county to the central time zone. The proposal was controversial in the county. A 2000 referendum favored changing to central time by a vote of 1,180 to 1,038.

However, a majority of written comments to the Department’s docket, and much of the sentiment of persons attending a public hearing, favored keeping the county in the mountain time zone. After considering the comments, and while acknowledging the reasons supporting a change, the Department decided to deny the petition (68 FR 53082; September 9, 2003). The Department’s decision noted that the Commission was free to file a new petition on the subject in the future. In a petition dated October 9, 2009, Mr. Lyle L. Latimer, Chairman of Mercer County Board of County Commissioners, asked the Department to move the county from the mountain time zone to the central time zone.

Under the Uniform Time Act, the Secretary of Transportation has authority to issue regulations modifying the boundaries between time zones in the United States in order to move an area from one time zone to another. The standard in the statute for such decisions is “regard for the convenience of commerce and the existing junction points and division points of common carriers engaged in interstate or foreign commerce.” The principal standard for deciding whether to change a time zone is defined very broadly to include consideration of all the impacts upon a community of a change in its standard of time. DOT has developed a series of questions to assist communities and us in determining the impact of a time zone change on the “convenience of commerce.” The Department considers information bearing on these questions in making its decision on a proposed time zone change.

1. From where do businesses in the community get their supplies, and to where do they ship their goods or products?

2. From where does the community receive television and radio broadcasts?

3. Where are the newspapers published that serve the community?

4. From where does the community get its bus and passenger rail services; if there is no scheduled bus or passenger rail service in the community, to where
