

to enhance security or minimize the risk?

Issue 3: Could hardware improvements be made that would further mitigate or minimize the radiological consequences?

Panel presentations:

- Irradiator manufacturers' presentation on safety features.
- Overview of the Department of Energy (DOE)/National Nuclear Security Administration (NNSA) voluntary security enhancement program.
- Licensee perspective of design changes.

Participant deliberations:

- What is the status of current CsCl designs regarding security enhancements?
- What are the benefits of the DOE/NNSA voluntary security enhancements and table-top exercises?
- Are other isotopes being considered for the future production of existing designs?
- Are new concepts being considered for new designs?

Issue 4: The development and use of alternative forms of cesium-137, while not required for adequate protection, is prudent and the NRC intends to monitor these developments closely.

Panel presentations:

- Overview of feasible alternatives from the irradiator manufacturers' perspective and from the users' perspective.
- Source manufacturers' presentation on new initiatives.
- Dispersibility considerations.

Participant deliberations:

- Are manufacturers currently considering the use of other forms of cesium (other than CsCl)? If yes, what alternatives are viable?

- What is the status of new developments?
- How can the effectiveness of new alternatives regarding solubility and dispersibility be measured?
 - What are the physical/chemical parameters?
 - How can risk reduction be quantified?

- How to formalize solubility and dispersibility parameters?

Issue 5: CsCl enables three specific classes of applications that benefit society:

- (a) Blood irradiation;
- (b) Bio-medical and industrial research; and
- (c) Calibration of instrumentation and dosimetry.

Panel presentations:

- Equipment needs of the blood irradiation industry.
- Conduct of bio-medical research in view of cesium-137 irradiation.

- Issues in calibration technology in view of cesium-137 sources.
- Status of alternative technologies.

Participant deliberations:

- What impact does the Draft Policy Statement pose for each of these applications?
- What is the licensees' experience in complying with the current security requirements in view of the three fields of applications?

- What technological changes are anticipated in these applications regarding the use of cesium-137 sources?

Issue 6: The NRC recognizes that currently there is no disposal capability for commercial CsCl sources. The NRC considers it imperative to develop a pathway for the long-term storage and disposal of these sources whether or not there are alternatives developed.

Panel presentations:

- Update from DOE on development of Environmental Impact Statement for a disposal facility.
- Licensees' perspective on storage and disposal of CsCl sources.
- Disposal of CsCl sources through DOE's Off-Site Recovery Program or Conference of Radiation Control Program Directors.

Participant deliberations:

- What are the major issues for licensees (users of CsCl sources) regarding disposal of their sources?
- What options are available?
- What are the (security and cost) impacts of the current regulatory environment on licensees?

IV. Solicitation for Stakeholder Input

To solicit stakeholder input during the public meeting, NRC will conduct a roundtable panel discussion, with opportunity for audience participation, for each issue contained in Section III of this document. The NRC is seeking the names of individuals interested in participating on these panels. Nominations by interested individuals or organizations should include the name of the proposed panel member, the issues they are interested in discussing, viewpoint(s) on the issue(s), and affiliation (if any). Roundtable panel participants will be selected with the goal of providing balanced viewpoints on each of the various issues. *Please see the ADDRESSES section of this document to submit nominations by October 8, 2010.* Nominations received after this date will be considered if it is practical to do so.

We encourage previous participants who attended, either as panel members or attendees, the prior public workshop held on September 29–30, 2008, to also participate in this meeting. Information

on the previous public meeting is accessible at <http://www.nrc.gov/materials/miau/licensing.html#cesium>.

Based on the comments received in both written and electronic form, and at the public meeting, the Commission will then be in a better position to proceed with the issuance of a final policy statement. The final policy statement, when issued by the Commission, will be published in the **Federal Register**.

Dated at Rockville, Maryland, this 20th day of September 2010.

For the Nuclear Regulatory Commission.
