Approval and Promulgation of Air Quality Implementation Plans; Maryland; Control of Volatile Organic Compounds Emissions From Industrial Solvent Cleaning Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the Maryland Department of the Environment (MDE). This SIP revision consists of an addition to Maryland's Volatile Organic Compounds from Specific Processes Regulation. Maryland has adopted standards for industrial solvent cleaning operations that satisfy the reasonably available control techniques (RACT) requirements for sources of volatile organic compounds (VOCs) covered by control techniques guidelines (CTG). This amendment reduces VOC emissions from industrial solvent cleaning operations. In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by October 29, 2010.
