COMMODITY FUTURES TRADING COMMISSION
Request for Comment on Options for a Proposed Exemptive Order Relating to the Trading and Clearing of Precious Metal Commodity-Based ETFs; Concept Release

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of options for a proposed exemptive order and request for comment; concept release.

SUMMARY: Recently, the Commodity Futures Trading Commission (“Commission,” or “CFTC”) has been confronted with the question of how to treat certain transactions on fractional undivided interests, or shares, in single commodity investment products referred to as exchange traded funds (“ETF” or “ETFs”), primarily in the commodity trading adviser (“CTA”) and may not implicate regulatory issues raised in this Release.

1 This Release is limited to those “Commodity ETFs” that are structured as grantor trusts with an investment objective of achieving the price performance of the underlying commodity or commodities held by such trust, less expenses. Further, for purposes of this Release, the term or label “ETF” is loosely applied to precious metal commodity-based ETFs (as used interchangeably herein, “Precious Metal Commodity-Based ETFs” or “Commodity-Based ETFs”), see section 3(a)(1) of the Investment Company Act of 1940 (the “1940 Act”), and Securities and Exchange Commission (SEC), Exchange-Traded Funds, Investment Company Act Release No. 28192 (March 11, 2008), 73 FR 14618, 14623 (March 18, 2008). As used herein, “Precious Metal” indicates either gold, silver, palladium, or platinum.

Additionally, when we refer to an “ETF” in this Concept Release, we are not (unless the context otherwise requires) referring to an entity that meets the definition of an “investment company” and is registered under the 1940 Act. This Release also does not address those “ETF Commodity Pools” that attempt to track a benchmark index or commodity by engaging in the purchase of commodity futures and/or options contracts. These ETF Commodity Pools are subject to regulation by the Commission as a commodity pool operator (“CPO”) and/or metals complex. The ETFs have in all relevant instances been structured as trusts (singularly, “ETF Trust” or “Trust”), the assets of which consist of holdings of one specific physical commodity. The explicit and sole investment objective of each of these ETF Trusts is to track as nearly as possible the spot price of the underlying physical commodity less the expenses of trust operations. The listing of these ETF shares provides shareholders with efficient exposure to commodity market price movements. These Precious Metal Commodity-Based ETFs have primarily focused on holding either gold or silver, with a recent expansion into palladium and platinum. The Commission has issued Orders pursuant to Section 4(c) of the Commodity Exchange Act (the “Act”) permitting the trading and clearing of certain transactions on these Trusts as, respectively, options on securities and security futures.

The Previous Orders have provided exemptions from certain provisions of the Act, or the Commission’s regulations thereunder, which might have been transgressed by trading or clearing, among other things, options and futures on Commodity-Based ETFs. The exemption mechanism has enabled the Commission to reserve judgment as to the jurisdictional classification (i.e. commodity or security) of Commodity-Based ETFs and options and futures on Commodity-Based ETFs while at the same time providing a mechanism to ensure both that the Commission’s regulatory
