

No Undue Risk to Public Health and Safety

The underlying purpose of the reporting requirements specified in 10 CFR 50.36a(a)(2) is to report to the Commission annually the quantity of each of the principal radionuclides released to unrestricted areas in liquid and in gaseous effluents during the previous 12 months, including any other information as may be required by the Commission to estimate maximum potential annual radiation doses to the public resulting from effluent releases. This exemption does not affect the information required to be submitted or the time period the report covers, only the date the report is submitted. Based on the above, no new accident precursors are created by extending the submittal date for the 2010 Radioactive Effluent Release Report from prior to March 1 to prior to May 1, 2011. Thus, the probability of postulated accidents is not increased. Also, based on the above, the consequences of postulated accidents are not increased. Therefore, there is no undue risk to public health and safety.

Consistent With Common Defense and Security

The proposed exemption would allow the licensee to submit the 2010 Radioactive Effluent Release Report prior to May 1, 2011, which would exceed the report submittal requirement of no longer than 12 months specified in 10 CFR 50.36a(a)(2) by 2 months. This change has no relation to security issues. Therefore, the common defense and security is not impacted by this exemption.

Special Circumstances

Special circumstances, in accordance with 10 CFR 50.12(a)(2)(v), are present whenever application of the regulation would provide only temporary relief from the applicable regulation and the licensee or applicant has made good faith efforts to comply with the regulation. The underlying purpose of the reporting requirement specified in 10 CFR 50.36a(a)(2) is to require each licensee to submit a report to the Commission annually that specifies the quantity of each of the principal radionuclides released to unrestricted areas in liquid and in gaseous effluents, including any other information as may be required by the Commission to estimate maximum potential annual radiation doses to the public resulting from effluent releases. The proposed exemption does not affect the information required to be submitted or the time period the report covers, only

the date the report is to be submitted. The requested exemption provides temporary relief from the regulation in that it affords a one-time extension for submitting the annual report. The proposed exemption is an appropriate means to ensure that future reports are submitted on an annual basis as required by 10 CFR 50.36a(a)(2). Therefore, since the underlying purpose of 10 CFR 50.36a(a)(2) is achieved, the special circumstances of 10 CFR 50.12(a)(2)(v) for the granting of an exemption from 10 CFR 50.36a(a)(2) exists.

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants Entergy Operations, Inc., a one-time exemption from the requirements of 10 CFR 50.36a(a)(2), for ANO-1 and ANO-2.

The Commission has determined that granting this one-time exemption from the requirements of a regulation of 10 CFR 50.36(a)(2) involves (i) no significant hazards consideration, (ii) no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, (iii) no significant increase in individual or cumulative public or occupational radiation exposure, (iv) no significant construction impact, and (v) no significant increase in the potential for or consequences from radiological accidents. In addition, the requirements from which this exemption is sought involve reporting requirements in 10 CFR 50.36a(a)(2). Accordingly, the exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(25)(i)-(vi). Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the NRC's consideration of this exemption.

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 28th day of September 2010.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting: Technical Lessons Gained From High-Level Nuclear Waste Disposal Efforts

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act of 1987, the U.S. Nuclear Waste Technical Review Board will meet in Dulles, Virginia, on October 26, 2010, to discuss technical aspects of the U.S. Department of Energy's (DOE) activities over the last 20 years related to managing and disposing of spent nuclear fuel and high-level radioactive waste. The Board will consider technical lessons that can be gained from those experiences that may be useful in informing future waste management and disposal efforts.

Former managers, contractors, and scientists associated with the Yucca Mountain program have been invited to discuss their experiences at the meeting. The Board also has invited representatives from affected units of governments in Nevada to provide their perspectives on technical oversight, and representatives from several countries with nuclear waste programs have been invited to discuss their own programs and their views of the U.S. experience to date.

The Board meeting will be held at the Marriott Washington Dulles Airport, 45020 Aviation Drive, Dulles, VA 20166; (tel.) 703-471-9500, (fax) 703-661-8714. A block of rooms has been reserved at the hotel for meeting attendees. To ensure receiving the meeting rate, reservations must be made by October 6, 2010. For directions to the hotel or to make reservations, go to <http://www.marriott.com/hotels/travel/iadap?groupCode=nucnuca&app=resvi> or call 800-228-9290.

A detailed meeting agenda will be available on the Board's Web site at <http://www.nwtrb.gov> approximately one week before the meeting. The

agenda also may be obtained by telephone request at that time. The meeting will be open to the public, and opportunities for public comment will be provided.

The meeting will begin at 8:30 a.m. on Tuesday morning. Time has been set aside at the end of the day for public comments. Those wanting to speak are encouraged to sign the "Public Comment Register" at the check-in table. A time limit may have to be set on individual remarks, but written comments of any length may be submitted for the record.

Transcripts of the meeting will be available on the Board's Web site, by e-mail, on computer disk, and on library-loan in paper format from Davonya Barnes of the Board's staff no later than November 22, 2010.

The Board was established as an independent Federal agency to provide objective expert advice to Congress and the Secretary of Energy on technical issues and to review the technical validity of DOE activities related to implementing the Nuclear Waste Policy Act. Board members are experts in their fields and are appointed to the Board by the President from a list of candidates submitted by the National Academy of Sciences. The Board is required to report to Congress and the Secretary no fewer than two times each year. Board reports, correspondence, congressional testimony, and meeting transcripts and materials are posted on the Board's Web site: <http://www.nwtrb.gov>.

For information on the meeting agenda, contact Karyn Severson. For information on lodging or logistics, contact Linda Coultry; 2300 Clarendon Boulevard, Suite 1300; Arlington, VA 22201-3367; (tel) 703-235-4473; (fax) 703-235-4495.

Dated: September 28, 2010.

Nigel Mote,

Executive Director, U.S. Nuclear Waste Technical Review Board.
