12 of the Appendix of its substantive response, dated July 1, 2010. Aqualon stated on September 15, 2010, that it had mistakenly referenced the wrong HTSUS number in its substantive response and intended to reference HTSUS number 3912.31.00.10. See Memorandum to the File from Dena Crossland, Regarding Preliminary Results of First Sunset Review of the Antidumping Duty Order on Purified Carboxymethylcellulose from Finland, the Netherlands, and Sweden; Correction to Domestic Interested Party’s July 1, 2010, Substantive Response, dated September 23, 2010.

Scope of the Orders

The merchandise covered by the orders is all purified CMC, sometimes also referred to as purified sodium CMC, polyanionic cellulose, or cellulose gum, which is a white to off-white, non-toxic, odorless, biodegradable powder, comprising sodium CMC that has been refined and purified to a minimum assay of 90 percent. Purified CMC does not include unpurified or crude CMC, CMC Fluidized Polymer Suspensions, and CMC that is cross-linked through heat treatment. Purified CMC is CMC that has undergone one or more purification operations, which, at a minimum, reduce the remaining salt and other by-product portion of the product to less than ten percent. The merchandise subject to the orders is currently classified in the HTSUS at subheading 3912.31.00. This tariff classification is provided for convenience and customs purposes; however, the written description of the scope of the orders is dispositive.

Analysis of Comments Received

All issues raised in these reviews are addressed in the “Issues and Decision Memorandum for the Expedited First Sunset Reviews of the Antidumping Duty Orders on Purified Carboxymethylcellulose from Finland, the Netherlands, and Sweden” from Susan H. Kuhbach, Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Deputy Assistant Secretary for Import Administration (Decision Memo), which is hereby adopted by, and issued concurrently with, this notice. The issues discussed in the Decision Memo include the likelihood of continuation or recurrence of dumping and the magnitude of the margins likely to prevail if the orders were revoked. Parties can find a complete discussion of all issues raised in these reviews and the corresponding recommendations in this public memorandum which is on file in the Central Records Unit, room 7046 of the main Department building. In addition, a complete version of the Decision Memo can be accessed directly on the Web at http://ia.ita.doc.gov/frn. The paper copy and electronic version of the Decision Memo are identical in content.

Final Results of Reviews

We determine that revocation of the antidumping duty orders on CMC from Finland, the Netherlands, and Sweden would be likely to lead to continuation or recurrence of dumping at the following weighted-average percentage margins:

3 Although HTSUS number 3912.31.00.10 may be more specific to subject merchandise, it was not created until 2005. As such, we are relying on HTSUS number 3912.31.00 for purposes of these sunset reviews because in determining whether revocation of an order would likely lead to continuation or recurrence of dumping, the Department considers the margins established in the investigation and/or reviews conducted during the sunset review period as well as the volume of imports for the periods before and after the issuance of the order. See section 752(c)(1) of the Act.

4 The Department preliminarily determined that Akzo Nobel Functional Chemicals B.V. is the successor-in-interest to Akzo Nobel Surface Chemistry B.V. See Purified Carboxymethylcellulose From the Netherlands: Preliminary Results of Antidumping Duty Administrative Review, 75 FR 48310 (August 10, 2010). The Department intends to issue the final results on December 8, 2010 [the deadline may be extended].
