BILLING CODE P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-134; NRC-2010-0053]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for the Leslie C. Wilbur Nuclear Reactor Facility at the Worcester Polytechnic Institute in Worcester, MA

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Ted Carter, Project Manager, Materials Decommissioning Branch, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission (NRC), Two White Flint North, Mail Stop T8 F5, 11545 Rockville Pike, Rockville, Maryland 20852-2738 Telephone: (301) 414-5543; fax number: (301) 415-5369; e-mail: ted.carter@nrc.gov.

SUPPLEMENTARY INFORMATION:

Introduction

The NRC is considering the issuance of a license amendment to Material License No. R-61 issued to the Worcester Polytechnic Institute (WPI) to authorize decommissioning of its Leslie C. Wilbur Nuclear Reactor Facility (LCWNRFF) located on the campus of WPI in the city of Worcester, Massachusetts for unrestricted use and termination of this license. NRC has prepared an Environmental Assessment (EA) (ML102020428) in support of this amendment in accordance with the requirements of 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

Environmental Assessment

Identification of the Proposed Action

By letter dated March 31, 2009, (ADAMS ML090960651), as supplemented on September 30, 2009 (ADAMS ML092880231), the licensee submitted a Decommissioning Plan (DP) in accordance with 10 CFR 50.82(b)(1), in order to dismantle the 10-kw (thermal) General Electric (GE) Reactor, to dispose of its component parts and radioactive material, and to decontaminate the facilities in accordance with the proposed DP to meet the NRC's unrestricted release criteria. After the NRC verifies that the release criteria have been met, Facility Operating License No. R-61 will be terminated. The licensee submitted an environmental report as part of the Final DP, dated September 2009, that addressed the estimated environmental impacts resulting from decommissioning the GE Reactor. The reactor is permanently shutdown, with the fuel removed from the core and stored in racks in the reactor pool. The objective of the decommissioning is the release of the reactor facility for unrestricted use.

A notice of license amendment request and opportunity to request a hearing was published in the **Federal Register** on March 8, 2010 (75 FR 10519-10524). No requests for a hearing were received.

Need for the Proposed Action

The proposed action is necessary because of WPI's decision to permanently cease operations at the LCWNRFF. As specified in 10 CFR 50.82, any licensee may permanently cease operation and apply to the NRC for license termination and authorization to decommission the affected facility. Further, 10 CFR 51.53(d) provides that each applicant for a license amendment to authorize decommissioning of a production or utilization facility shall submit an environmental report with its application that reflects any new information or significant environmental changes associated with the proposed decommissioning activities. WPI is planning unrestricted use for the area that would be released.

Environmental Impact of the Proposed Action

Many of the potential environmental impacts that would normally be associated with a decommissioning project are not applicable to the WPI decommissioning program. The factors distinguishing the WPI decommissioning program include: The small size of the facility, the limited
