Title: NSPS for New Residential Wood Heaters (Renewal).

ICR Numbers: EPA ICR Number 1176.09, OMB Control Number 2060-0161.

ICR Status: This ICR is schedule to expire on December 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain-EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standard for New Residential Wood Heaters was proposed on February 18, 1987, and promulgated on February 26, 1988. This standard applies to each wood heater either manufactured on or after July 1, 1988, or sold at retail on or after July 1, 1990. Wood heaters manufactured on or after July 1, 1990, or sold at retail on or after July 1, 1992, must meet more stringent emission standards. Approximately 54 manufacturers, 875 retailers, and 5 certification laboratories are currently subject to the regulations. It is estimated that no additional sources will become subject to the standard over the next three years. Particulate Matter (PM) is the pollutant regulated under the standard.

Two features of this rulemaking are unique to the New Source Performance Standard (NSPS) program. First, these standards were negotiated by representatives of groups affected by the NSPS, including those groups which are burdened by the information collection activities. These representatives judged none of these activities unreasonable. The affected groups recommended some of these provisions as a means of promoting an efficient and smooth running certification and enforcement program. Second, these regulations established a certification program instead of the usual NSPS requirement that each affected facility demonstrated compliance through new source review and testing. Under this certification program, a single wood heater is tested to demonstrate compliance for an entire model line which could consist of thousands of stoves. The certification approach significantly reduces the compliance burden, including information collection, for the manufacturers of wood heaters. Because of the potential risks to the environment from the intentional or accidental misuse of the certification approach, there were several safeguards included, some of which entail reporting and recordkeeping.

Under this regulation, wood heater manufacturers, testing laboratories, and retailers are required to submit reports to EPA and/or to maintain records for demonstrating compliance with the NSPS.

The information supplied by the manufacturer to the Agency is used to: (1) Ensure that Best Demonstrated Technology is being applied to reduce emissions from wood heaters; (2) ensure that the wood heater tested for certification purposes is in compliance with the applicable emission standards; (3) provide assurance that interested production model heaters have emission

performance characteristics similar to tested models; and (4) provide an indicator of continued compliance.

Information supplied to the Agency by testing laboratories is used to either grant or to deny laboratory accreditation, and to assist in enforcement and compliance activities. Information requested by the Agency from manufacturers is used to determine compliance with requirements that are based upon volume of production.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are list in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 51 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining, information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: New residential wood heaters.

Estimated Number of Respondents: 934.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 9,729.

Estimated Total Annual Cost: \$2,260,853, which includes \$912,853 in labor costs, \$1,345,500 in capital/startup costs, and \$2,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no increase in the number of affected facilities or the number of responses compared to the previous ICR. There is however, an increase in the estimated labor burden hours of one hour, as currently identified in the OMB Inventory of Approved Burdens, due to rounding of the calculations. This increase is not due to any program changes. We also updated the labor

rates, which resulted in an increase in labor cost.

Weekly receipt of Environmental Impact Statements

Filed 09/27/2010 through 10/01/2010. Pursuant to 40 CFR 1506.9.

Notice

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public. Historically, EPA has met this mandate by publishing weekly notices of availability of EPA comments, which includes a brief summary of EPA's comment letters, in the **Federal Register**. Since February 2008, EPA has been including its comment letters on EISs on its Web site at: <http://www.epa.gov/compliance/nepa/eisdata.html>. Including the entire EIS comment letters on the Web site satisfies the Section 309(a) requirement to make EPA's comments on EISs available to the public. Accordingly, on March 31, 2010, EPA discontinued the publication of the notice of availability of EPA comments in the **Federal Register**.
