The Commission strongly encourages electronic filings of comments, protests, and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission’s Web site (http://www.ferc.gov) under the “e-Filing” link.

Kimberly D. Bose,
Secretary.
[FR Doc. 2010–25506 Filed 10–8–10; 8:45 am]
BILLING CODE 6717–01–P

I. Background

The NAC/AEGL Committee is a discretionary Federal advisory committee chartered under the Federal Advisory Committee Act (FACA), Public Law 92–463. The NAC/AEGL Committee was established in 1995 with the intent to develop AEGls for use in chemical emergency programs. An initial priority list of 85 chemicals for AEG development was published in the Federal Register on May 21, 1997 (62 FR 27734) (FRL–5718–9), and since that time has increased to approximately 300 chemical substances, for which AEG values are developed and submitted to the National Academies (NAS) for peer review and publication. Additional background information and progress of the NAC/AEGL Committee may be found on its Web site at http://www.epa.gov/oppt/aegl.

Members are appointed by the EPA Administrator for 2–year terms with the possibility of reappointment. The NAC/AEGL Committee generally meets two times annually, or as needed and approved by the Designated Federal Officer (DFO). Meetings will generally be held in Washington, DC. Members may serve as Representative Government Employees (Federal members) or Special Government Employees (non Federal members) and EPA may provide reimbursement for travel expenses associated with official government business.

II. Request for Nominations

EPA is seeking nominations from all sectors, including academia, industry, non-governmental organizations, and State, local and Tribal governments. In an effort to obtain nominations of diverse candidates, EPA encourages nominations of women and men of all racial and ethnic groups.

In selecting Committee members, EPA will seek candidates who possess: Extensive professional knowledge of toxicological methodologies and development of human health standards for acute exposure; a demonstrated ability to examine and analyze complicated human health issues with objectivity and integrity; excellent interpersonal as well as oral and written communication skills; and an ability and willingness to participate in a deliberative and collaborative process. In addition, well qualified applicants must be prepared to process a 15 hour per month to the Committee’s deliberative and collaborative process. In addition, well qualified applicants must be prepared to process a 15 hour per month to the Committee’s deliberative and collaborative process.
