## DEPARTMENT OF COMMERCE

### Bureau of Industry and Security

#### Technical Advisory Committees; Notice of Recruitment of Private-Sector Members

**SUMMARY:** Seven Technical Advisory Committees (TACs) advise the Department of Commerce on the technical parameters for export controls applicable to dual-use commodities and technology and on the administration of those controls. The TACs are composed of representatives from industry representatives, academic leaders and U.S. Government representing diverse points of view on the concerns of the exporting community. Industry representatives are selected from firms producing a broad range of goods, technologies, and software presently controlled for national security, non-proliferation, foreign policy, and short supply reasons or that are proposed for such controls, balanced to the extent possible among large and small firms.

TAC members are appointed by the Secretary of Commerce and serve terms of not more than four consecutive years. The membership reflects the Department's commitment to attaining balance and diversity. TAC members must obtain secret-level clearances prior to appointment. These clearances are necessary so that members may be permitted access to the classified information needed to formulate recommendations to the Department of Commerce. Each TAC meets approximately four times per year. Members of the Committees will not be compensated for their services.

The seven TACs are responsible for advising the Department of Commerce on the technical parameters for export controls and the administration of those controls within the following areas: Information Systems TAC: Control List Categories 3 (electronics), 4 (computers), and 5 (telecommunications and information security); Materials TAC: Control List Category 1 (materials, chemicals, microorganisms, and toxins); Materials Processing Equipment TAC: Control List Category 2 (materials processing); Regulations and Procedures TAC: The Export Administration Regulations (EAR) and Procedures for implementing the EAR; Sensors and Instrumentation TAC: Control List Category 6 (sensors and lasers); Transportation and Related Equipment TAC: Control List Categories 7 (navigation and avionics), 8 (marine), and 9 (propulsion systems, space vehicles, and related equipment) and Emerging Technology and Research Advisory Committee: (1) The identification of emerging technologies and research and development activities that may be of interest from a dual-use perspective; (2) the prioritization of new and existing controls to determine which are of greatest consequence to national security; (3) the potential impact of dual-use export control requirements on research activities; and (4) the threat to national security posed by the unauthorized exports of technologies.

To respond to this recruitment notice, please send a copy of your resume to Ms. Yvette Springer at [Yspringer@bis.doc.gov](mailto:Yspringer@bis.doc.gov).

**Deadline:** This Notice of Recruitment will be open for one year from its date of publication in the **Federal Register**.

**DEPARTMENT OF ENERGY**

[FE Docket No. 10-114-LNG]

**Chevron U.S.A. Inc.; Application for Blanket Authorization To Export Liquefied Natural Gas**

**AGENCY:** Office of Fossil Energy, DOE.

**ACTION:** Notice of application.

**SUMMARY:** The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application (Application), filed on September 9, 2010, by Chevron U.S.A. Inc. (Chevron), requesting blanket authorization to export liquefied natural gas (LNG) that previously had been imported into the United States from foreign sources in an amount up to the equivalent of 72 billion cubic feet (Bcf) of natural gas on a short-term or spot market basis over a two year period commencing on the date of the authorization. The LNG would be exported from the Sabine Pass LNG Terminal (Sabine Pass) owned by Sabine Pass LNG, L.P., in Cameron Parish, Louisiana to any country with the capacity to import LNG via ocean-going carrier and with which trade is

not prohibited by U.S. law or policy. The application was filed under section 3 of the Natural Gas Act (NGA) as amended by section 201 of the Energy Policy Act of 1992. Protests, motions to intervene, notices of intervention, and written comments are invited.

**DATES:** Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, November 12, 2010.

**ADDRESSES:** U.S. Department of Energy (FE-34), Office of Oil and Gas Global Security and Supply, Office of Fossil Energy, Forrestal Building, Room 3E-042, 1000 Independence Avenue, SW., Washington, DC 20585.

**FOR FURTHER INFORMATION CONTACT:** Larine Moore or Marc Talbert, U.S.

**SUPPLEMENTARY INFORMATION:**

**Background**

Chevron is a Pennsylvania corporation with its principal place of business in San Ramon, California. Chevron Global Gas is a division of Chevron that engages in the global business of marketing and trading LNG. Chevron has contracted for 1.0 Bcf per day of terminal capacity from Sabine Pass for an initial term of twenty years that commenced in November 2004 with the option to extend the term for a period of twenty years. On July 14, 2010, DOE/FE Order No. 2813 granted Chevron blanket authorization to import the equivalent of up to 800 Bcf of natural gas from various international sources for a two year period beginning on August 1, 2010. Under the terms of the blanket authorization, LNG may be imported at any LNG receiving facility in the United States and its territories.

**Current Application**

In the instant application, Chevron requests blanket authorization to export up to 72 Bcf of previously imported LNG, on a cumulative basis, over a two-year period beginning on the date the authorization is granted. Chevron requests that such authorization apply

to previously imported LNG to which Chevron holds title, and to previously imported LNG that Chevron may export on behalf of other parties that hold title to such LNG. Chevron is seeking authorization to export such previously imported LNG to any country with the capacity to import LNG via ocean-going carrier and with which trade is not prohibited by Federal law or policy. Chevron does not request authority to export any domestically produced natural gas or LNG.

The blanket export authorization requested by Chevron would be applicable to exports from the Sabine Pass terminal, owned by Sabine Pass LNG, L.P. in Cameron Parish, Louisiana. Chevron states that DOE/FE recently granted an authorization for exports from this terminal by another party<sup>1</sup> and has granted other authorizations under similar requests.<sup>2</sup> Chevron states that there are no other proceedings related to this application currently pending before the DOE or any other federal agency.

As background, Chevron states the request to export previously imported LNG is based on its desire to optimize long-term capacity it has contracted for at the Sabine Pass terminal by responding effectively to periodic changes in domestic and world markets for natural gas and LNG. More specifically, Chevron asserts it desires the option to either export previously imported LNG to other world markets, or regasify the imported LNG for sale in domestic markets. Chevron states that it would base any decision related to the sale of imported LNG on prevailing market conditions. Chevron asserts that it does not intend to export any LNG when market conditions dictate that the LNG be used to meet domestic needs.

**Public Interest Considerations**

In support of its application, Chevron states that pursuant to section 3 of the NGA, FE must authorize exports to a foreign country unless there is a finding that such exports "will not be consistent with the public interest."<sup>3</sup> Chevron states that section 3 creates a statutory presumption in favor of approval of a properly framed export Application.<sup>4</sup>
