Supplemental information: On September 9, 2010 (75 FR 54808), EPA published a proposed rule proposing to approve in part and disapprove in part the State implementation plan (SIP) revisions submitted by the State of Arizona to meet the Clean Air Act (CAA) requirements applicable to the serious Maricopa County (Phoenix) nonattainment area (Maricopa area). These requirements apply to the Maricopa area following EPA’s June 6, 2007 finding that the area failed to meet its December 31, 2006 serious area deadline to attain the national ambient air quality standards (NAAQS) for particulate matter of ten microns or less (PM–10). Under CAA section 189(d), Arizona was required to submit a plan by December 31, 2007 providing for expedient attainment of the PM–10 NAAQS and for an annual emission reduction in PM–10 or PM–10 precursors of not less than five percent per year until attainment (189(d) plan).

In the Agency’s September 9, 2010 proposed rule, EPA proposed to disapprove provisions of the 189(d) plan for the Maricopa area because they do not meet applicable CAA requirements for emissions inventories as well as for attainment, five percent annual emission reductions, reasonable further progress and milestones, and contingency measures, and to disapprove the 2010 motor vehicle emission budget in the 189(d) plan as not meeting the requirements of CAA section 176(c) and 40 CFR 93.118(e)(4). EPA also proposed a limited approval and limited disapproval of State regulations for the control of PM–10 from agricultural sources. Finally, EPA proposed to approve various provisions of State statutes relating to the control of PM–10 emissions in the Maricopa area.

The September 9, 2010 proposed rule provided a 30-day public comment period ending on October 12, 2010. In response to a request for an extension of the comment period from Benjamin H. Grumbles, Director, Arizona Department of Environmental Quality, and Dennis Smith, Executive Director, Maricopa Association of Governments, submitted by letter dated October 4, 2010, EPA is extending the comment period to October 20, 2010.

Environmental Protection Agency

40 CFR Part 300

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the Denver Radium Superfund Site

Agency: Environmental Protection Agency.

Action: Proposed rule, extension of public comment period.

Summary: The Environmental Protection Agency (EPA) Region 8 issued a Notice of Intent to Delete portions of the Denver Radium Superfund Site from the National Priorities List (NPL) on September 9, 2010 (75 FR 54779). The portions proposed for deletion are each of the 11 operable units at the Denver Radium Site, located in the City and County of Denver, Colorado.

Groundwater contamination associated with Operable Unit 8 will remain on the NPL. To ensure that everyone has an opportunity to comment, EPA is extending the public comment period through November 1, 2010.

The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of Colorado, through the Colorado Department of Public Health and Environment (CDPHE), have determined that all appropriate response actions under CERCLA, other than operation, maintenance and five-year reviews have been completed.

This rationale for deleting the 11 operable units of the Denver Radium Superfund Site has not changed. The Federal Register notice for the proposed deletion (75 FR 54779) discusses this rationale in detail.

Dates: Comments concerning the proposed partial deletion may be submitted to EPA on or before November 5, 2010.

Addresses: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–1983–0002, by one of the following methods:
