I. Abstract

Under section 101(b) of the Marine Mammal Protection Act of 1972 (MMPA), as amended (16 U.S.C. 1361-1407), Alaska Natives residing in Alaska and dwelling on the coast of the North Pacific or Arctic Oceans may harvest polar bears, northern sea otters, and Pacific walrus for subsistence or handicraft purposes. Section 109(i) of the MMPA authorizes the Secretary of the Interior to prescribe marking, tagging, and reporting regulations applicable to the Alaska Native subsistence and handicraft take.

On behalf of the Secretary, we implemented regulations at 50 CFR 18.23(f) for Alaska Natives harvesting polar bear, northern sea otter, and Pacific walrus. These regulations enable us to gather data on the Alaska Native subsistence and handicraft harvest and

on the biology of polar bear, northern sea otter, and Pacific walrus in Alaska to determine what effect such take may be having on these populations. The regulations also provide us with a means of monitoring the disposition of the harvest to ensure that any commercial use of products created from these species meets the criteria set forth in section 101(b) of the MMPA. We use three forms to collect the information, which includes, but is not limited to:

- Date of kill.
- Sex of the animal.
- Kill location.
- Age of the animal (i.e., adult, subadult, cub, or pup).
- Form of transportation used to make the kill of polar bears.
- Amount of time (i.e., hours/days hunted) spent hunting polar bears.
- Type of take (live killed or beach found) for walrus.
- Number of otters present in and number of otters harvested from pod.
- Condition of the bear and whether or not polar bear cubs were present.
- Name of the hunter or possessor of the specified parts at the time of marking, tagging, and reporting.

Draft Friends Organizations Policy

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to establish a policy to guide Service employees to increase efficiency and effectiveness in achieving the Service's mission through partnerships with Friends organizations (volunteer/advocate). This draft policy provides guidance for Service employees who work with Friends organizations to increase community involvement in our programs. Specifically, it includes guidance regarding financial and administrative practices, Friends Partnership Agreements, and revenue generating operations. We propose to incorporate this draft policy as Part 633, chapters 1-4 of the Fish and Wildlife Service Manual.

Background

The National Wildlife Refuge System Volunteer and Community Partnership Enhancement Act of 1998 (16 U.S.C. 742f) amended the Fish and Wildlife Act of 1956 to promote volunteer programs and community partnerships for the benefit of national wildlife refuges. The Act states that we will "encourage the use of volunteers in the management of refuges and facilitate partnerships between the Refuge System and non-Federal entities to promote public awareness of the resources of the Refuge System and public participation in the conservation of those resources." The National Fish Hatchery System Volunteer Act of 2006 (16 U.S.C. 760aa) provides for the expansion of volunteer projects and community partnerships of the National Fish Hatchery System. The Act states that we will "enhance an existing volunteer program of the United States Fish and Wildlife Service and promote community partnerships for the benefit of national fish hatcheries and fisheries program offices." Both Acts direct us to work with volunteers and partners to promote public awareness and participation in our conservation programs. This draft policy for Friends organizations was based on these statutory requirements.

The National Friends Program was established in 1996 to encourage and organize community involvement in Service activities. The program works to expand the number and effectiveness of community-based Friends organizations which assist us in delivering our mission. During the last decade, the Friends program has grown substantially in size and complexity. There are more than 230 Friends organizations, with an estimated total of 40-60,000 members. These organizations significantly strengthen the work of refuges, waterfowl production areas, and fish hatcheries and program offices across the country.

Draft Policy

We recognize that Friends provide many vital services to our sites and programs. This draft policy provides guidance on roles and responsibilities for both the Service and Friends organizations. The purpose of this draft policy is to provide Service employees with guidance when working with Friends organizations.

Chapter 1 of this draft policy identifies the authorities for working with Friends organizations; describes the relationship between the Service and Friends organizations; and describes the responsibilities of Service employees and Friends organizations.

Chapter 2 describes the information we need when we consider the financial and administrative activities under Friends agreements, including the practices and activities that the Service may allow on Government property.

Chapter 3 describes the major components of, and process for developing and modifying, the legal Friends Partnership Agreement between Friends organizations and the Service.

Chapter 4 describes how we work with Friends organizations to manage revenue-generating operations on Service property.

Request for Public Comments

We seek public comments on the draft Friends policy, and will consider comments and any additional information we receive during the comment period (*see DATES*).
