Abstract of Proposed Collection

Annual reports from designated program sponsors assist the Department in oversight and administration of the J-1 visa program. The reports provide statistical data on the number of exchange participants an organization sponsored per category of exchange. The reports also provide a summary of the activities in which exchange visitors were engaged and an evaluation of program effectiveness. Program sponsors include government agencies, academic institutions, and private sector not-for-profit and for-profit entities.

Methodology

Annual reports are completed through the Student and Exchange Visitor

Information System (SEVIS) and then printed and signed by a sponsor official, and sent to the Department by mail or fax. The Department is currently working with the Department of Homeland Security to expand SEVIS functions and enable the collection of electronic signatures. Annual reports will be submitted to the Department electronically as soon as the mechanism for doing so is approved and in place. DHS has announced a delay in implementation of SEVIS II. Please follow the indicated electronic link for complete details: http://www.ice.gov/sevis/sevisii/sevisii_update_032010.htm.

SUPPLEMENTARY INFORMATION:

A. USW Petition

On September 9, 2010, the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO CLC filed a petition under Section 302 of the Trade Act addressed to China’s acts, policies, and practices affecting trade and investment in green technologies. The text of the petition has been posted on <http://www.ustr.gov>, under “Enforcement.”

The petition defines products of green technology “as products used to produce renewable energy or reduce the emissions associated with the production and use of energy. These are the products necessary to produce energy from wind, solar, biomass, geothermal, hydro, and nuclear resources, products to enable the production of energy from coal with fewer greenhouse gas emissions, and products that consume less energy or alternative sources of energy, such as energy-efficient vehicles and energy-efficient lighting.” The petition also covers “a wide range of upstream inputs to green technology products.”

The petition alleges that China “employs a wide range of policies to stimulate and protect its domestic producers of green technology, from wind and solar energy products to advanced batteries and energy-efficient vehicles,” enabling China to become the dominant global supplier of a number of green technologies. The petition alleges that China’s acts, policies, and practices in the area of green technology violate China’s WTO commitments under the GATT 1994, under the Subsidies and Countervailing Measures Agreement (“SCM Agreement”), and under China’s Protocol of Accession to the WTO.
