

foreign nuclear installations and that it has so far identified as many as 300 to 1,800 types of goods or services that go into constructing and operating a nuclear power plant. CIGNL stated its intent to work through these issues and difficulties with a view toward development of an approach to propose to DOE for establishing the CSC cost allocation formula among U.S. nuclear suppliers. As observed by CIGNL, it would be beneficial if the major U.S. nuclear suppliers provided to DOE comprehensive and informed comments on the cost allocation formula and related issues in response to the NOI.

DOE has determined that extension of the comment period is appropriate based on the foregoing reasons and is hereby extending the comment period to November 30, 2010. Given the importance of proceeding in a timely manner toward development of regulations pertaining to section 934, DOE does not intend to grant any further extensions. Accordingly, DOE will consider any comments received by November 30, 2010 to be timely submitted.

Issued in Washington, DC, on October 14, 2010.
