FOR FURTHER INFORMATION CONTACT: Amy Sloan or Jennifer Skidmore, (301) 713-2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to import biological samples from 10 subadult male fur seals over a five-year period for studies on mechanisms of sleep in fur seals. Fur seals will be captured in Russia, held in captivity, sampled while in captivity, and euthanized at the termination of study to obtain their brains. Whole brains and brain tissues will be imported to the U.S. for anatomical and immunohistochemical studies. The first aim of the project is to correlate the release of major neurotransmitters in the brain of the fur

seal during sleep and waking using microdialysis, high-performance liquid chromatography and radioimmunoassay analysis. The second aim of the study is to localize the distribution of the above mentioned cell groups in the fur seal brain as well as to localize the positions of the sites where the microdialysis samples were collected. Samples would be imported from Russia to UCLA for analysis and samples would be exported from the U.S. to South Africa for additional analysis.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: October 15, 2010.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
