BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2010-0262]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on July 29, 2010.

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* NRC Form 4, "Cumulative Occupational Dose History."

3. *Current OMB approval number:* 3150-0005.

4. *The form number if applicable:* NRC Form 4.

5. *How often the collection is required:* On occasion.

6. *Who will be required or asked to report:* NRC licensees who are required to comply with 10 CFR part 20.

7. *An estimate of the number of annual responses:* 3,848 (0 reporting responses plus 3,848 recordkeepers).

8. *The estimated number of annual respondents:* 3,848.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 18,410 hours.

10. *Abstract:* NRC Form 4 is used to record the summary of a radiation worker's cumulative occupational radiation dose, including prior occupational radiation exposure and the current year's occupational radiation exposure. NRC Form 4 is used by licensees, and inspected by NRC, to ensure that occupational radiation doses do not exceed the regulatory limits specified in 10 CFR 20.1501.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by November 29, 2010. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

Christine J. Kymn, Desk Officer, Office of Information and Regulatory Affairs (3150-0005), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be e-mailed to Christine.J.Kymn@omb.eop.gov or submitted by telephone at (202) 395-4638.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2010-0142]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on April 4, 2010.

1. *Type of submission:* Revision

2. *The title of the information collection:* NRC Form 212

"Qualifications Investigation, Professional, Technical, and Administrative Positions", and NRC Form 212A "Qualifications Investigation Secretarial/Clerical"

3. *Current OMB approval number:* 3150-0033 and 3150-0034

4. *The form number if applicable:* NRC Form 212 "Qualifications Investigation, Professional, Technical, and Administrative Positions", and NRC Form 212A "Qualifications Investigation Secretarial/Clerical"

5. *How often the collection is required:* The forms are collected for

every new hire to the U.S. Nuclear Regulatory Commission.

6. *Who will be required or asked to report:* References are collected for every new hire.

7. *An estimate of the number of annual responses:* NRC Form 212: 1,000 annual responses. NRC Form 212A: 400 annual responses.

8. *The estimated number of annual respondents:* NRC Form 212: 1,000 annual respondents. NRC Form 212A: 400 annual respondents.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* NRC Form 212: 500 hours. NRC Form 212A: 100 hours.

10. *Abstract:* Information requested on NRC Form 212, "Qualifications Investigation, Professional, Technical, and Administrative Positions (other than clerical positions)" and NRC Form 212A, "Qualifications Investigation, Secretarial/Clerical" is used to determine the qualifications and suitability of external applicants for employment with NRC. The completed forms may be used to examine, rate and/or assess the prospective employee's qualifications. The information regarding the qualifications of applicants for employment is reviewed by professional personnel of the Office of Human Resources, in conjunction with other information in the NRC files, to determine the qualifications of the applicant for appointment to the position under consideration.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-269, 50-270, and 50-287; NRC-2010-0334]

Duke Energy Carolinas, LLC; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (NRC, the Commission) is considering issuance of an amendment to Renewed Facility Operating License Nos. DPR-38, DPR-47, and DPR-55 issued to Duke Energy Carolinas, LLC (the licensee) for operation of the Oconee Nuclear Station, Units 1, 2, and 3, (ONS) located in Oconee County, South Carolina.

The proposed amendment would approve the transition of the fire protection licensing basis at ONS from Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.48(b) to 10 CFR 50.48(c), *National Fire Protection Association* (NFPA) 805.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

Operation of ONS in accordance with the proposed amendment does not increase the probability or consequences of accidents previously evaluated. The Updated Final Safety Analysis Report (UFSAR) documents the analyses of design basis accidents (DBA) at ONS. The proposed amendment does not adversely affect accident initiators nor alter design assumptions, conditions, or configurations of the facility and does not adversely affect the ability of structures, systems, and components (SSCs) to perform their design function. SSCs required to safely shut down the reactor and to maintain it in a safe shutdown (SSD) condition will remain capable of performing their design functions.

The purpose of this amendment is to permit ONS to adopt a new fire protection (FP) licensing basis which complies with the requirements in 10 CFR 50.48(a) and (c) and the guidance in Revision 1 of Regulatory Guide (RG) 1.205. The NRC considers that National Fire Protection Association (NFPA) 805 provides an acceptable methodology and performance criteria for licensees to identify FP systems and features that are an acceptable alternative to the Appendix R FP features (69 FR 33536, June 16, 2004). Engineering analyses, in accordance with NFPA 805, have been performed to demonstrate that the risk-informed, performance-based (RI-PB) requirements per NFPA 805 have been met.

NFPA 805, taken as a whole, provides an acceptable alternative to 10 CFR 50.48(b) and satisfies 10 CFR 50.48(a) and General Design Criterion (GDC) 3 of Appendix A to 10 CFR Part 50 and meets the underlying intent of the NRC's existing FP regulations and guidance, and achieves defense-in-depth (DID) and the goals, performance objectives, and performance criteria specified in Chapter 1 of the standard. The small increases in core damage frequency associated with this LAR submittal are consistent with the Commission's Safety Goal Policy. Additionally 10 CFR 50.48(c) allows self approval of fire protection program changes post-transition. If there are any increases post-transition in core damage frequency (CDF) or risk, the increase will be small and consistent with the intent of the Commission's Safety Goal Policy.

Based on this, the implementation of this amendment does not significantly increase the probability of any accident previously evaluated. Equipment required to mitigate an accident remains capable of performing the assumed function. Therefore, the consequences of any accident previously evaluated are not significantly increased with the implementation of this amendment.

(2) Does the proposed amendment create the possibility of a new or different kind of accident from any kind of accident previously evaluated?

Response: No.

Operation of ONS in accordance with the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. Any scenario or previously analyzed accident with offsite dose was included in the evaluation of DBAs documented in the UFSAR. The proposed change does not alter the requirements or
