**Public Comment**

The Department will disclose to parties to this proceeding the calculations performed in reaching the preliminary results within five days of the date of publication of these preliminary results. See 19 CFR 351.242(b). Interested parties may submit written comments (case briefs) within 30 days of publication of the preliminary results and rebuttal comments (rebuttal briefs) within five days after the time limit for filing case briefs. See 19 CFR 351.309(c)(1)(i) and 351.309(d)(1). Pursuant to 19 CFR 351.309(d)(2), rebuttal briefs must be limited to issues raised in the case briefs. Parties who submit arguments are requested to submit with the argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities. Further, the Department requests that parties submitting written comments provide the Department with a diskette containing the public version of those comments.

Any interested party may request a hearing within 30 days of publication of this notice. See 19 CFR 351.310(c). Interested parties who wish to request a hearing or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration within 30 days of publication of this notice. Requests should contain: (1) The party’s name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. See 19 CFR 351.310(c). Issues raised in the hearing will be limited to those raised in the briefs.

Unless the deadline is extended pursuant to section 751(a)(2)(B)(iv) of the Act, the Department will issue the final results of these NSRs, including the results of our analysis of the issues raised by the parties in their comments, within 90 days after issuance of these preliminary results.

**Deadline for Submission of Publicly Available Surrogate Value Information**

In accordance with 19 CFR 351.301(c)(3), the deadline for submission of publicly available information to value factors of production under 19 CFR 351.408(c) is 20 days after the date of publication of the preliminary determination. In accordance with 19 CFR 351.301(c)(1), if an interested party submits factual information less than ten days before, on, or after (if the Department has extended the deadline) the applicable deadline for submission of such factual information, an interested party has ten days to submit factual information to rebut, clarify, or correct the factual information no later than ten days after such factual information is served on the interested party. However, the Department notes that 19 CFR 351.301(c)(1) permits new information only insofar as it rebuts, clarifies, or corrects information recently placed on the record. See, e.g., Glycine from the People’s Republic of China: Final Results of Antidumping Duty Administrative Review and Final Rescission, in Part, 72 FR 58809 (October 17, 2007) and accompanying Issues and Decision Memorandum at Comment 2. Furthermore, the Department generally will not accept business proprietary information in either the surrogate value submissions or the rebuttals thereto, as the regulation regarding the submission of surrogate values allows only for the submission of publicly available information.

**Assessment Rates**

Upon issuing the final results of the review, the Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review. Pursuant to 19 CFR 351.212(b)(1), we will calculate importer-specific ad valorem duty assessment rates based on the ratio of the total amount of the dumping margins calculated for the examined sales to the total entered value of those same sales. We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review if any importer-specific assessment rate calculated in the final results of this review is above de minimis. However, the final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of these reviews and for future deposits of estimated duties, where applicable.

**Cash Deposit Requirements**

The following cash deposit requirements, when imposed, will be effective upon publication of the final results of these NSRs for all shipments of subject merchandise exported by Fengyu or Tongfa and entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) For subject merchandise manufactured and exported by Fengyu or Tongfa, the cash-deposit rate will be the present value of the preliminary duties; (2) for subject merchandise exported by Fengyu or Tongfa but not manufactured by Fengyu or Tongfa, respectively, the cash deposit rate will continue to be the PRC-wide rate (i.e., 198.63 percent); and (3) for subject merchandise manufactured by Fengyu or Tongfa, but exported by any other party, the cash deposit rate will be the rate applicable to the exporter. If the cash deposit rates calculated for Fengyu or Tongfa in the final results is zero or de minimis, a zero cash deposit will be required for entries of subject merchandise both produced and exported by Fengyu or Tongfa. These cash deposit requirements, when imposed, shall remain in effect until further notice.

**Notification to Importers**

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties. These NSRs and notice are in accordance with sections 751(a)(2)(B) and 777(i) of the Act and 19 CFR 351.214(i).

Ronald Lorentzen,
Deputy Assistant Secretary for Import Administration.

National Institute of Standards and Technology

[Docket No.: 101006483–0483–02]

Proposed Voluntary Product Standard PS 2–10, Structural Plywood

AGENCY: National Institute of Standards and Technology, Commerce.
ACTION: Notice and request for comments.

SUMMARY: The National Institute of Standards and Technology (NIST) is soliciting public comment on a proposed revision to Voluntary Product Standard (PS) 2–04, Performance Standard for Wood-Based Structural-Use Panels. This revised standard, PS 2–10, was prepared by the Standing Committee for PS 2 and establishes requirements, for those who choose to adhere to the standard, for the structural criteria to assess the acceptability of wood-based structural-use panels for construction sheathing and single-floor applications. It also provides a basis for common understanding among the producers, distributors, and the users of these products. Interested parties are invited to review the proposed standard and submit comments to NIST.

DATES: Written comments regarding the proposed revision, should be submitted to the Standards Services Division, NIST, no later than November 29, 2010.

ADDRESSES: An electronic copy (an Adobe Acrobat File) of the proposed standard, PS 2–10, can be obtained at the following Web site: http://sni.nist.gov/global/index.cfm/L1-5/l2-44/A-355. This site also includes an electronic copy of PS 2–04 (the existing standard) and a summary of significant changes. Written comments on the proposed revision should be submitted to David F. Alderman, Standards Services Division, NIST, 100 Bureau Drive, Stop 2150, Gaithersburg, MD 20899–2150. Electronic comments may be submitted to david.alderman@nist.gov.

FOR FURTHER INFORMATION CONTACT: David F. Alderman, Standards Services Division, National Institute of Standards and Technology, telephone (301) 975–4019; fax: (301) 975–4715, e-mail: david.alderman@nist.gov.

SUPPLEMENTARY INFORMATION: Proposed Voluntary Product Standard PS 2–10 establishes structural criteria for assessing the acceptability of wood-based structural-use panels for construction sheathing and single-floor application, and provides a basis for common understanding among the producers, distributors, and the users of these products. After conducting a review of the current standard, PS 2–04, the Standing Committee for PS 2 determined that updates were needed to reflect current industry practices, and developed this proposal through meetings to review the standard and propose needed changes. The proposed standard does not address non-structural issues such as resistance to biological agents. Applications for structural plywood other than construction sheathing and single-floor sheathing may require additional engineering considerations that are not covered by this document.

The proposed revision of the standard has been developed and is being processed in accordance with Department of Commerce provisions in Title 15 of the U.S. Code of Federal Regulations, part 10, Procedures for the Development of Voluntary Product Standards, as amended (published June 20, 1986). The Standing Committee for PS 2 is responsible for maintaining, revising, and interpreting the standard, and is comprised of producers, distributors, users, and others with an interest in the standard. Committee members voted on the revision, which was approved unanimously. The Committee then submitted a report to NIST along with the voting results and the draft revised standard. NIST has determined that the revised standard should be issued for public comment. The revision includes the following changes:

• Panel thickness: In order to resolve the inconsistency with NIST standards used by “weights and measures” regulators, PS 2 will require labeling with both a “Performance Category,” which is a fractional label such as 15/32, and a decimal thickness declaration, such as “THICKNESS 0.438 IN.” The Performance Category will maintain consistency with the panel thickness specifications required in the U.S. model codes. The Performance Category panel labeling will permit the abbreviations “PERF CAT” or “Category.” The decimal thickness declaration will help assure that panels are compliant with weights and measures regulations.

• Two nonmandatory appendices were added to provide guidance on NIST Handbook 130 “Packaging and Labeling Regulations,” and to provide suggested thickness labeling. Nonmandatory appendices on attributes related to Green Building and Formaldehyde were added.

• A nonmandatory appendix on the history of PS 2 was added.

• The moisture content specifications for the “dry,” “wet/redry” and “wet” test conditions were clarified in various sections of the standard.

• The tables containing performance requirements were modified to provide clarity and references to the sections of the standard that provide the test methods and pass/fail criteria used during the qualification process.

• The original fastener holding requirements for sheathing were based on thin plywood panels made with Group 4 species. Those panels are not representative of current sheathing panels. In addition, some U.S. model code requirements for wall sheathing were made more stringent, such that the existing nail holding requirements may not justify certain wind load conditions. Therefore, a test program to characterize the nail holding properties of current production was conducted by two testing agencies. Based on those test results, some requirements for nail holding performance of sheathing were increased.

All public comments will be reviewed and considered. The Standing Committee for PS 2 and NIST will revise the standard accordingly.

Harry S. Hertz,
Director, Baldrige Performance Excellence Program.

National Fire Protection Association (NFPA): Request for Comments on NFPA’s Codes and Standards

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: Since 1896, the National Fire Protection Association (NFPA) has accomplished its mission by advocating scientifically based consensus codes and standards, research, and education for safety related issues. NFPA’s National Fire Codes®, which holds over 290 documents, are administered by more than 238 Technical Committees comprised of approximately 7,200 volunteers and are adopted and used throughout the world. NFPA is a nonprofit membership organization with approximately 80,000 members from over 70 nations, all working together to fulfill the Association’s mission.

The NFPA process provides ample opportunity for public participation in the development of its codes and standards. All NFPA codes and standards are revised and updated every three to five years in Revision Cycles that begin twice each year and take approximately two years to complete. Each Revision Cycle proceeds according to a published schedule that includes final dates for all major events in the process. The process contains five basic
