

Given the dynamic nature of the ocean environment, and that exact locations and magnitude of renourishment cycles may fluctuate, additional NEPA documentation for subsequent actions may be prepared in the future, as appropriate.

NASA published a Notice of Availability (NOA) of the *Draft SRIPP Programmatic Environmental Impact Statement* on February 26, 2010 (75 FR 8997). NASA mailed over 125 hard copies and/or compact disks (CDs) of the Draft PEIS to potentially interested Federal, State, and local agencies; organizations; and individuals. In addition, the Draft PEIS was made publicly available in electronic format on NASA's Web site. The public review and comment period for the Draft PEIS closed on April 19, 2010. NASA received a total of 12 submissions (letters and e-mails) from Federal, State, and local agencies; organizations; individuals; and its Independent Technical Review team. The resulting 315 individual comments received spanned a broad range of topics; however the majority of commentors expressed concern regarding effects of the project on wildlife, fisheries, and sediment transport. The comments are addressed in the Final PEIS in Appendix N. NASA also formally consulted with resource agencies regarding potential effects of the program on Federally threatened and endangered species, Essential Fish Habitat, cultural and historic resources, and coastal resources. The outcomes of these consultations are summarized in the Final PEIS and are also included as appendices.
