[Docket ID PHMSA-2010-0294]

Pipeline Safety: Control Room Management Implementation Workshop

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of workshop.

SUMMARY: PHMSA is conducting a workshop in conjunction with the National Association of Pipeline Safety Representatives (NAPSR) on the implementation of pipeline control room management. The workshop is intended to foster an understanding of the Control Room Management Rule issued by PHMSA on December 3, 2009, and is open to the public. Panel discussions will provide insight on topics associated with fatigue management and maximum hours of service, alarm management, and adequate information. Those attending the workshop will have the opportunity to ask questions about the rule while engaging in open discussions with various stakeholders including representatives from the public, regulatory, and industry. This workshop will also provide PHMSA input to further refine guidance material currently in development.

DATES: The workshop will be held on November 17, 2010. Name badge pick up and on-site registration will be available starting at 7:30 a.m., with the workshop taking place from 8 a.m. until approximately 5:15 p.m. Refer to the meeting website for updated agenda and times at <https://primis.phmsa.dot.gov/meetings/Mtg67.mtg>. The workshop will not be a live webcast, however, all workshop presentations and an audio recording will be available on the PHMSA meeting website. Workshop presentations will also be available on the meeting docket.

ADDRESSES: The workshop will be held at the Intercontinental Hotel, 2222 West Loop South, Houston, TX 77027. Hotel reservations under the "USDOT CRM Meeting" room block for the nights of November 16 and 17, 2010, can be made at 1-800-316-8645. A daily base rate of \$109.00 is available. The meeting room will be posted at the hotel on the day of the workshop.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: On December 3, 2009, (74 FR 63310) PHMSA issued a final rule "Control Room Management/Human Factors" which became effective on February 1,

2010. The final rule amended the Federal pipeline safety regulations to address human factors and other aspects of control room management for certain pipelines where controllers use supervisory control and data acquisition (SCADA) systems. Under the final rule, pipeline operators must implement methods to reduce the risk associated with controller fatigue. In addition, certain operators must define the roles and responsibilities of controllers and provide controllers with the necessary information, training, and processes to fulfill these responsibilities. Affected operators must also manage alarms, ensure control room considerations are taken into account when changing pipeline equipment or configurations, and review reportable incidents for accidents to determine whether control room actions contributed to the event.

The workshop will include presentations highlighting several topical areas and the sharing of specific solutions based on initial feedback received from stakeholders. The panel format will offer the opportunity for dialogue and sharing of ideas to help PHMSA generate guidance material.
