*Obligation To Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. sections 154, 160, 251-254, 303 and 332.

*Total Annual Burden:* 7,500 hours.

*Total Annual Cost:* N/A.

*Nature and Extent of Confidentiality:* There are no questions of a confidential nature are asked.

*Needs and Uses:* The Commission will submit this expiring information collection (IC) to the OMB as an extension during this comment period to obtain the full three-year clearance from them. The Commission is reporting no change in burden estimates and no change in the reporting requirement.

The Commission responded to petitions for reconsideration of certain aspects of the *Third Report and Order*, FCC 99–245, in the proceeding concerning the establishment of a nationwide wireless enhanced 911 (E911) emergency communications service.

The *Fourth Report and Order*, FCC 00–236, revised and made adjustments to the deployment schedule that must be followed by wireless carriers that chose to implement E911 service using a handset-based technology. The Commission also deferred the date for initial distribution of Automatic Location Identification (ALI)-capable handsets by seven months; adjusting the timetable for carriers to meet certain interim benchmarks for activating new ALI-capable handsets; deferred the date by which a carrier must achieve full penetration of ALI-capable handsets by one year; modified the manner in which the Commission defined full penetration; eliminated the separate handset phase-in schedule triggered by a request from a Public Safety Answering Point (PSAP), and addressed several other issues regarding implementation of enhanced 911 Phase II. The Commission also discussed its general approach toward possible request for waiver of the E911 Phase II requirements. As a general rule, the Commission's rules may be waived for good cause shown and that waivers are only appropriate if special circumstances warrant a deviation from the general rule and will serve the public interest. Wireless carriers are instructed to submit waiver requests that are specific, focused and limited in scope, and with a clear path to full compliance. A waiver request must specify the solutions considered and explain why none could be employed in a way that complies to the Phase II rules. If deployment must be delayed, the carrier should specify the reason for the delay and provide a revised schedule.

The Commission found that waivers of the E911 Phase II requirements should not generally be warranted, especially in light of the vital public safety benefits of Phase II. However, in those particular cases where waivers may be justified, broad generalized waivers should not be necessary and will not be granted. Further, carriers

should undertake concrete steps necessary to come as close as possible to full compliance and should document their efforts aimed at compliance in support of any waiver requests. Carriers seeking a waiver will be expected to specify the solutions they considered and explain why none could be employed in a way that complies with the Phase II rules. If deployment is scheduled but for some reason must be delayed, the carrier should specify the reason for the delay and provide a revised schedule.
